IBM DB2 Recovery Expert for Multiplatforms provides an enhanced data recovery solution that enables more precise recovery operations while reducing disruption during the recovery process. DB2 Recovery Expert creates and maintains additional recovery assets that you can use for intelligent analysis of both DB2 and DB2 Recovery Expert assets to find the most efficient recovery path. DB2 Recovery Expert facilitates the process of rebuilding your database assets, such as tables, indexes, and data, to a specified point-in-time, often without taking the database or the business operations offline. This IBM Redbooks publication shows you how to install and implement DB Recovery Expert and the Fast Backup and Grouper components. It also describes the DB2 Recovery Expert assets and how to manage these assets. In addition, this book explains the summary and detail reports of Log Analysis, including the DPF environment. It shows, in detailed examples, point-in-time recovery and cloning of tables, table spaces, and databases. Please note that the additional material referenced in the text is not available from IBM.

Dr. Freddie L. Thomas was a historian and a scientist, an inventor and an author, a book collector, a composer, civil rights leader, and a scholar -- who had mastered the art of teaching. Born in Virginia, he studied at Virginia State University, Wagner College, Albany Medical School, and the University of Rochester. He did significant biological research at the Eastman Kodak Company and at the University of Rochester, but was also known as an authority in Afro-American and Jewish cultural history. The focus of the biography is not specifically centered on the scientific aspects of Dr. Thomas's life, but also the political and social environments of the communities he encountered. Equally significant, he reached out to young people,

both from prominent and poor families (including gang members) to teach them, the importance of obtaining a quality education. He spent an enormous amount of time with youths teaching them everything from basic rudiments of English and mathematics to complex mathematics, physics, philosophy, and religion. It was his way to seek out youngsters in the streets, get them interested in learning and then teaching them, if they were willing to apply themselves. He tutored all kinds of people in all kinds of places. Although, he never had a teaching certificate and never received any financial compensation in return. He didn't do it because he was after any gain of money or power. It was his natural way of living. He was indeed, a Silent Leader. Dr. Thomas died in 1974.

Mini Down Under traces the history of one of New Zealand's - and the world's - best-loved cars. More versions of the Mini were available in New Zealand than anywhere else, and the launching of the iconic car in February 1960 was a larger-than-life event. In this lively and personal story, the author tracks the Mini's life in New Zealand, the connection between Kiwi racing driver Bruce McLaren and the birth of the Mini Cooper, the heady days of competition success in the Antipodes, the local assembly and marketing of the classic original car and the eventual development into the latest generation Mini for a new century.
