When the mysterious Tatee walks into the renowned Manhattan Tango Studio all hell breaks loose, not a single person stays unaltered: old friendships are challenged and put to the test; seemingly confident women are alarmingly threatened by the novel newcomer's presence; cool sleek men lose their steps, stuttering incomprehensible disobedient words. Unprepared for surreal and outlandish relationships she takes the role of an intrigued observer witnessing the unfolding drama where the dance floor reveals a theatre of the absurdity of human nature. The other stories explore the profoundness of human psyche where joy, suffering, humour and even madness can all be found. Encounter stories about cult escapees, an incompetent lawyer, a liberated husband, a case of mistaken identity and the serendipitous nature of synchronicity.

At the cross Christ made possible a "divine exchange" for everyone who believes in him. What is this exchange? Because Jesus endured all the evil due to humankind, believers can actually partake in all the good due to him. In this meaty book, acclaimed scholar Derek Prince explores the astounding results of the atonement for followers of Christ. In place of punishment, wounding, death, poverty, shame, and rejection, Christ freely offers forgiveness, healing, life, abundance, glory, and acceptance. In addition, Prince gives biblical grounding for five areas of deliverance that are made available through the cross: deliverance from

this present evil age, from the law, from self, from the flesh, and from the world. This brand-new edition includes a new mini-study course at the end of each chapter, perfect for individual or small group study.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine

architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. - Presents the latest requirements and challenges for personal transport applications - Gives an insight into the technical advances and research going on in the IC Engines field - Provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Three to Tango and Other Tales

Engine production for the typical car manufactured today is a study in mass production. Benefits in the manufacturing process for the manufacturer often run counter to the interests of the end user. What speeds up production and saves manufacturing costs results in an engine that is made to fall within a wide set of standards and specifications, often not optimized to meet the original design. In short, cheap and fast engine production results in a sloppy final product. Of course, this is not what enthusiasts want out of their engines. To maximize the performance of any engine, it must be balanced and blueprinted to the exact tolerances that the factory should have adhered to in the first place. Four cylinder, V-8, American or import, the performance of all engines is greatly improved by balancing and blueprinting. Dedicated enthusiasts and

professional racers balance and blueprint their engines because the engines will produce more horsepower and torque, more efficiently use fuel, run cooler and last longer. In this book, expert engine builder and veteran author Mike Mavrigian explains and illustrates the most discriminating engine building techniques and perform detailed procedures, so the engine is perfectly balanced, matched, and optimized. Balancing and blueprinting is a time consuming and exacting process, but the investment in time pays off with superior performance. Through the process, you carefully measure, adjust, machine and fit each part together with precision tolerances, optimizing the design and maximizing performance. The book covers the block, crankshaft, connecting rods, pistons, cylinder heads, intake manifolds, camshaft, measuring tools and final assembly techniques. For more than 50 years, balancing and blueprinting has been

an accepted and common practice for maximizing

What woman doesn't love cute shoes? Rhonda Rhea's not afraid to admit her obsession with them--or to use this "shallow" addiction as a basis for a book! High Heels in High Places is a biblical journey for women who want to go deeper in their spiritual lives, but also want fall-off-your-high-heels laughter along the way. Using Colossians 1:9-12 as a springboard, Rhonda takes women on a fun adventure infused with practical spiritual truth about what it means to walk worthy before God. This unique and hilarious exploration is perfect for the "shoe overachiever" in all of us. It makes a great gift for the woman who has it all (and just doesn't have enough closet space to store it), or can be an enlightening small group resource.

The court of James I is a volatile place, with factions led by warring cousins Robert Cecil and Francis Bacon. Europe is seething with conflict between Protestants and Catholics. James sees himself as a grand peacemaker - and what better way to make his mark than to use his children in marriage negotiations? Into this court come Henry, Prince of Wales, and his sister Elizabeth. Their louche father is so distrusted that soon they are far more popular than he is: an impossibly dangerous position. Then Elizabeth is introduced to Frederick of Bohemia, Elector Palatine. He's shy but they understand one another. She decides he will be her husband - but her parents change their minds. Brutally denied Henry's support, how can Elizabeth forge her own future? At once a love story, a tale of international politics and a tremendous evocation of England at a time of great change, this is a landmark novel to thrill all lovers of fine historical fiction.
