Following on from the merger between AMG and DaimlerChrysler in 1999, things really began to happen for AMG Mercedes-Benz enthusiasts. The special touch of the AMG engineers was being seen on every model in the entire vast Mercedes-Benz model range, from the prosaic C-Class through to the S-Class and the SLK sports cars, as well as the ML and G-Class off-roader wagons. Not to be left out was the exotic Mercedes-Benz SLR McLaren with its supercharged 5.5 litre quad-cam V8 engine that was fettled by the AMG people. Included are road and comparison tests, model releases, technical and performance data, plus advice on buying a Mercedes-Benz AMG. Models covered include the C30, 32 & 55, CLK430, 55, TDM & GTR, CL55 & 65, CLS55, E55, G55, ML55, S55 & 65, SL55 & 65, SLK32 & 55 Plus SLR McLaren.

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary

achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

anarchism tends to be fragmentary, country-specific, or focused on single individuals. This new translation of Ángel Cappelletti's wide-ranging, country-by-country historical overview of anarchism's social and political achievements in fourteen Latin American nations is the first book-length regional history ever published in English. With a foreword by the translator. Ángel J. Cappelletti (1927–1995) was an Argentinian philosopher who taught at Simon Bolivar University in Venezuela. He is the author of over forty works primarily investigating philosophy and anarchism. Gabriel Palmer-Fernandez is Distinguished Professor of Philosophy and Religious Studies at Youngstown State University.

The private provision trend in technical and vocational education (TVE) in sub-Saharan Africa occurred as the deterioration of state-run TVE systems in the region created a market niche for private providers. While advocates of deregulation believe the adoption of market principles in TVE will lead to greater efficiency and effectiveness, private providers have emerged in an uncoordinated and unmonitored fashion. A literature review and case studies of two countries Senegal and Mali led to some of the following key findings: (1) in some countries the majority of TVE students are enrolled in private institutions; (2) a large number of private TVE institutions operate illegally; (3) private provision concentrates on the service and commercial trades; and (4) the private sector may operate with lower costs and be more responsive to the labor market, but they do not provide much job-related training or include work-experience programs. Some of the policy issues are as follows: (1) simplifying procedures for establishing private TVE institutions facilitates their growth but is not sufficient to prevent the growth of an illegal sector; (2) the lack of regulation for private TVE institutions raises complex issues regarding the mechanisms required to ensure quality and protect consumers against abuses; and (3) for private TVE to succeed, students and the programs themselves must receive some public funding and develop relationships with industry. Nothing says summer like driving a convertible. The car without a roof has always been a symbol for luxury and *laissez-faire*.

And it still holds true today: everybody who's anybody drives "topless." The larger four-seater convertibles in particular have always been highly sought after--but they are difficult to build and have usually been made as coupés for this reason. Mercedes-Benz has always been a pioneer in this area. 'Mercedes-Benz: The Grand Cabrios & Coupes' gives us a peek at the long-standing partnership between Mercedes-Benz and Stuttgart-based photographer, Rene Staud. Carefully staged photos show graceful curves and precision down to the finest details that convey the company's dedication to a very special kind of driving pleasure. This volume presents the most important convertibles and related coupes from 100 years of Daimler automotive history. A special highlight is Daimler's new flagship, a convertible based on the new S-class that is being rolled out at the 2015 IAS. Even though summer eventually comes to an end, and sunny days can give way to showers, this book stands for everlasting convertible adventures. AUTHOR: Photographer Rene Staud made a breakthrough with the development of his Magicflash lighting technology; this type of surface lighting helps him greatly in his ad photos for top-shelf automakers. Staud and his team continue to develop new ways to meet the highest demands of the industry in both creativity and service. He has amassed 35 years of experience in ad photography; and has literally built the image of many companies with his photos. SELLING POINTS: \* Open this glorious photo book and experience the classic Mercedes-Benz convertibles and the newest models in such realistic detail, you'll want to touch them \* Elegantly-staged cars that made automotive history \* Breathtaking curves that make "driving topless" a delight

- A thrilling photographic account of the treasure trove of cars kept by the Mercedes-Benz Museum in Stuttgart that are not currently on display to the public The Mercedes-Benz Museum in Stuttgart is one of the largest and most visited industrial museums in the world. But the 160 or so automobiles on display are only a small part of the shiny chrome treasures that form the Mercedes-Benz Classic vehicle collection. Another 1,000 historical models are 'parked' in secret places outside Stuttgart - these secret places are called the 'Holy Halls'. This collection is the treasure trove of the brand. It has existed since 1923 and offers a comprehensive overview of the model history of Mercedes-Benz. Cars with special technology and equipment are stored here, as are the silver arrows of Caracciola, Lang and Fangio, the Pope's carriages, the state cars of the young Federal Republic of Germany or Mercedes models that became collectors' items due to their prominent previous owners. Some of these exhibits are well protected and waiting in special wooden boxes for their next use at exhibitions, fairs, events or classic car races. Others stand next to each other as silent witnesses of the past. Each time a model is modified, the collection is extended by the last vehicle of the discontinued series, which experts believe will be one of tomorrow's classic cars. The 'Holy Halls' are not open to the public; enquiries from editorial offices and TV teams have often been rejected. But, during the years 2016 to 2018, almost all the vehicles of the Mercedes collection were photographed. Thus, a unique photographic collection was created, the automobile history from more than ten decades; many of the previously unpublished photographs are exclusively available here in this book. In addition, Mercedes-Benz Classic agreed to open the 'Holy Halls' for an external photo team and provide information about the car models stored there. For the first time, it has been possible to produce a fascinating illustrated book with panoramic and detailed shots from the 'halls', and lively photo reports on cars that tell stories - from the first Benz motor car to the latest Formula 1 racing car. Equally thrilling are the stories of the unique specimens and prototypes that are stored in the 'Holy Halls': Mercedes models that never went into production are presented for the first time. The stories about the selected automobiles of the vehicle collection are supplemented by historical recordings from the Mercedes-Benz Classic archive.

What it means when media moves from the new to the habitual—when our bodies become archives of supposedly obsolescent media, streaming, updating, sharing, saving. New media—we are told—exist at the bleeding edge of obsolescence. We thus forever try to catch up, updating to remain the same. Meanwhile, analytic, creative, and commercial efforts focus exclusively on the next big thing: figuring out what will spread and who will spread it the fastest. But what do we miss in this constant push to the future? In *Updating to Remain the Same*, Wendy Hui Kyong Chun suggests another approach, arguing that our media matter most when they seem not to matter at all—when they have moved from “new” to habitual. Smart phones, for example, no longer amaze, but they increasingly structure and monitor our lives. Through habits, Chun says, new media become embedded in our lives—indeed, we become our machines: we stream, update, capture, upload, link, save, trash, and troll. Chun links habits to the rise of networks as the defining concept of our era. Networks have been central to the emergence of neoliberalism, replacing “society” with groupings of individuals and connectable “YOUS.” (For isn’t “new media” actually “NYOU media”?) Habit is central to the inversion of privacy and publicity that drives neoliberalism and networks. Why do we view our networked devices as “personal” when they are so chatty and promiscuous? What would happen, Chun asks, if, rather than pushing for privacy that is no privacy, we demanded public rights—the right to be exposed, to take risks and to be in public and not be attacked?

"Drug Trafficking, Corruption and States" is cutting edge research. Garay Salamanca and Salcedo-Albaran, along with their contributing authors help document the transition from economic to political imperatives within transnational drug cartels. The break from the Zetas by La Familia Michoacana is one example contained in their empirical survey. Social Network Analysis is their tool for illuminating the varying dynamics of cartel-state inter-penetration and reconfiguration. In doing so they clearly discern between State Capture (StC) and Co-opted State Reconfiguration (CStR). As the drug wars and criminal insurgencies rage in the Americas and beyond, this seminal framework will facilitate efforts by scholars, law enforcement officials, intelligence analysts and policymakers to understand shifts in sovereignty, and to illuminate the mechanisms of transnational illicit networks and their interaction with the state."
