Can't believe how easy it is to remove a Mercury boat engine and outdrive! (time lapse)

Since the 3.0L marine engines are not used in automotive applications there aren't enough cores to support a good remanufacturing option in our opinion. GM produced 2 different 3.0L model marine engines up through 1994. They were both 3.0L models but had different cylinder heads which is where they got the different performance levels

Many contemporary MerCruiser engines employ electronic fuel injection, or EFI, that takes the place of carburetors used on older engines. The components consist of a throttle body, intake manifold, ECU module and sensors. Electronic fuel injection delivers a fuel and air mixture to the engine with more efficiency than carburetor fuel systems.
