Yamaha 4-Stroke Outboard Maintenance Parts - PartsVu

In the old days, many marine engine cooling systems were of the “raw-water” variety, meaning simply that they relied on pumping whatever water the boat was floating in through the engine and pumping it out the exhaust system—salt water, polluted water, algae-infested water, whatever was available.

Refer to Maintenance – Fuel System for filter removal. Cooling System Problem. Continuous. Engine Guardian System is activated. Power limit will vary with level of overheat. Shift outboard into neutral and check for a steady stream of water coming out of the water pump indicator hole.

Relieving the pressure building up in the cooling system will give you better circulation and hopefully help the vehicle from overheating during the 50 minute idle. A clean, free-flowing system, would be the best environment for the product, and in doing so, would give the Head Gasket Sealer the best possible chance of working properly.
