Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

MerCruiser Stern Drive, Alpha Generation II, 1992-96

The human Confederation is on the verge of total defeat. The Trivar rats and the life-draining Antaron have taken turns and now, their cruel overlords, the Scions, have joined the fight. As if the odds weren't bad enough already. The Scions are savage, brutal and arrogant. They have brought with them a weapon beyond comprehension. If the Scions are not stopped, everyone will die. Captain Becky Keller is flying the refitted ES Devastator. It's the only spaceship with the firepower to match the Scions in a one-on-one. Unfortunately, this enemy doesn't fight fair. Neither does humanity. Not anymore. Deep in the Devastator's hold, Lieutenant Joe Nation and his squad wait to try out the newest piece of untested Space Corps tech. If it works, they'll have a chance to show the Scions exactly what happens when you push too hard. Some people push back. There is one question even victory will not answer. Is this midgame, endgame, or has the fight for survival only just begun? Galaxy Bomb is a high-action science fiction adventure involving massive space battles, overwhelming odds and exciting technologies. It continues the Transcended series and picks up straight after book 3: Far Strike.
