Inboard & V-Drive Engine Models. Specify Your Engine Model When Ordering. Mercruiser Engines Mag 350 Coolant Your Mercruiser engine requires proper care and maintenance. Winter temperatures can easily crack an engine block and increase the chance of rust and corrosion. Winterization maintenance will prevent costly damage to your engine and stern drive. If water is detected in any of the lubrication systems, you must correct ...  
**MERCUISER ALARMS AND**

**FAULT CODES**  
For full extended winter storage, after completely draining the cooling system, Mercury MerCruiser requires the use of propylene glycol antifreeze (with a rust inhibitor for marine engines) in the seawater section of the cooling system. The fuel system must have fuel stabilizer added and the system must be fogged with 2-cycle oil.

introduction of the 502 Mag MPI Mercruiser offered the first of several engines with the cold manifold style cooling system. However around the 2000 model year Mercruiser realized that the cost of warranty related to condensation induced engine damage had escalated significantly over the past 8 years and was ...

### **Frequently**

**Asked Questions | Mercury Marine**  
MERCUISER ALARMS AND FAULT CODES Applies to Mercruiser engines with PCM 555, including 496 MAG and 8.1S. Similar to ECM 555 engines (4.3, 5.0, 350, 6.2). "Pwr Limit" = percentage of power available (may be limited by Engine Guardian).  
**Engine**

Coolant Temp (ECT) sensor (near thermostat) measures temperature of closed-circuit coolant.  
**MerCruiser RePower - Complete Drop-In Engines - NuWave Marine**  
Plumb the Quick Flush Valve permanently into your engine's cooling system. In normal operation the two main valves are open, allowing cooling water to flow from the raw water pickup to the

---

engine, while the flush water inlet valve is closed. This maintains the flow of cooling water to the engine during normal operation.

Engines like the MerCruiser 350 MAG MPI offer air-activated drainage using a supplied hand pump. Lock it onto the actuator fitting and pressurize

the system until the green indicators extend. (No need to remove drain plugs; the air should purge the water. If not, drain as described in Step 2.)
