Mercury Stern Drive (1964 - 1992) Bloomsbury

Publishing

The first in a series of highly practical, hands on, step-by-step photographic manuals, *Replacing Your Boat's Engine* fills a gap in the market for the DIY boat builder and repairer. It is a subject covered only in piecemeal fashion by the yachting press, which, like general boat repair manuals, can't go into the level of detail Mike Westin does. This is a visual, hand-holding guide, dwelling on the practical details of replacing a boat's engine and related systems as it explains each procedure rather than focussing on the theory (which is relegated to an appendix, for those who wish to go further). Anyone who wishes to upgrade their boat's engine or replace an ailing or broken engine will find this step-by-step illustrated book a hand-holding godsend.

Popular Science Wiley

The aim of this book with its detailed step-by-step colour photographs and diagrams, is to enable every owner to fix their outboard motor with ease. Troubleshooting tables help diagnose potential problems, and there is advice on regular maintenance and winterising and repair. Jean-Luc Pallas's enthusiasm for passing on his knowledge, as well as his clear explanations, precise advice and step-by-step instructions make this a unique book.
