Originally printed in 1946, The Fleet Type Submarine series of technical manuals remains unparalleled. Contained in its pages and those of the companion texts are descriptions of every operating component aboard a fleet boat. Electrical Installations, Navpers 16162, was originally written to acquaint submarine crews with the theory, operation, and construction of the components of the electrical installations. It especially emphasizes maintenance features and methods. Featuring explanatory text and numerous, detailed diagrams, the book is a wonderful reference for the museum docent, researcher, or anyone who ever wondered ¿ how the heck does that work? ¿ Originally classified ¿ Restricted ¿ , this book was recently declassified and is here reprinted in book form. Some illustrations have been slightly reformatted, and color plates are reproduced in black and white. Care has been taken to preserve the integrity of the text.

*Munitions Industry: Hearings before the Special Committee to Investigating the Munitions Industry , United States Senate -- 74th Congress, 1st Session, pursuant to S. Res. 206.*

This is a follow-up and companion to the successful How to Build a Flathead Ford V-8. This new edition describes the build-up of a 1946-1948 model 59 engine with a 4-barrel carburetor, a blown French flathead engine, and a blown Ardun engine-designed for street use. Many French flathead engines have been purchased by flathead lovers in the United States. There is a strong demand for those engine blocks, and the purchasers are desperate for any build-up information. The popularity of the Ardun is amazing, and this second volume contains a load of new information about the Ardun, as well as information and photographs of the lastest flathead goodies, such as crankshafts, connecting rods, intake manifolds, and cylinder heads.

*Munitions Industry: September 4-6, 1934. Electric Boat Co*  
. Topical . Written by leading Japanese, America, and European scholars . Based on proceedings of prestigious international conference Japan is now the world's largest producer of cars but it only began to catch up with its competitors after World War II by studying and modifying the Ford system of mass production implemented first in the USA in the early part of the century. Other countries have also developed the system in their own ways with varying degrees of success. The papers in this volume will examine and compare the experiences of different countries in modifying the Ford system, and the impact of the quality control movement' and lean production in Japan."
