The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of
an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the
engine and how they interact; how fuel is transformed into propulsion; regular maintenance and repair worksheets to help even the most
mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to
allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After
reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This
popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at
developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway,
transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in
FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to

reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons.
