A look at a 45 Hp
Mercury classic 50
1986 longshaft
outboard motor.
Starting it and a look
under the hood

I'm going to
try and get

my bud's
Classic 50,
45 hp two
stroke
outboard
running this
weekend. I
believe it's
a mid '80s
motor.

Anybody know where I can get a free download manual for it? Thanks.

NOTE: Mercury DOES NOT Use Model Years For Parts Lookup. This Chart Is For Reference Only, Since Many Aftermarket Parts Manufacturers DO List Parts By Year A "0" in front of the serial number is not significant, it's a placeholder only for Mercury's software. So if your serial number is "0 1234567" you would use only the

"1234567" part of it when looking at the chart below

I have a 1988 Mercury Classic 50 (45 hp) 4 cylinder outboard and I have just bought the Mercury Shop Manual for this unit. The manual is quite good but as I am new to outboard mtc. I have a few questions for the experts: 1. In my sailing days I had a 6hp Johnson which had a thermostat but I cannot find where this is located on the Mercury. Got a 45 hp

I have a Mercury 1987 classic 50 4 cylinder 45 hp outboard on a 16 foot bass boat. It takes it a long long time to plane out and go to 4000 rpm. It recently started doing this. It achieves 4000 rpm quickly with the little throttle tab on the control quadrant while the boat is still but not when gunning it with the big throttle control. Exploded view diagram of a
