Re: mercruiser inboard ignition wiring If you look at the diagram you will see only 3 terminals being used. Question, does the switch in question have a

push feature? If so it is an outboard switch which will not work. You can use an standard automotive switch, which may not last as many years due to materials it is made from. i.e. not brass.

The product and all

its parts can last for many years. The number of years depends on how often the MerCruiser product is used and the power source that it utilizes. If the power source of the MerCruiser motor is gasoline, it can be expected to run for 1,500 continuous hours before needing substantial repairs.

5.7 Repair Manual

In 1957 Kiekhaefer produced the most powerful Outboard motor in the world

at just 60 Horsepower. However the Inboard motors having been converted from an automotive engine were both big & heavy. The other problem with Inboard Motors was that the engine required being angled such that a more optimal Propeller Shaft angle was achievable. This therefore meant the

propeller angle was
not just pushing
the boat forward
but also pushing
upwards on the boat
and not in the
optimal direction
the boat ...
