In 1957 Kiekhaefer produced the most powerful Outboard motor in the world at just 60 Horsepower. However the Inboard motors having been converted from an automotive engine were both big & heavy. The other problem with Inboard Motors was that the engine required being angled such that a more optimal Propeller Shaft angle was achievable. This therefore meant the propeller angle was not just pushing the boat forward but also pushing upwards on the boat and not in the optimal direction the boat ...

Re: mercruiser inboard ignition wiring If you look at the diagram you will see only 3 terminals being used. Question, does the switch in question have a push feature? If so it is an outboard switch which will not work. You can use a standard automotive switch, which may not last as many years due to materials it is made from. i.e. not brass.

How long does an inboard engine last? The product and all its parts can last for many years. The number of years depends on how often the MerCruiser product is used and the power source that it utilizes. If the power source of the MerCruiser motor is gasoline, it can be expected to run for 1,500 continuous hours before needing substantial repairs.
