Mercury Pollution and Enforcement of the Refuse Act of 1899 Devereux Books (MA)

The long-awaited story of the marine industry's most celebrated personality, Carl Kiekhaefer, the industrial Caesar of the Mercury marine industry empire. "His obsession with success, and his legendary style made him the most extraordinary entrepreneur in the history of the industry."--Jack Reichert, Chairman, Brunswick Corporation.

Polluting for Pleasure Motorbooks Workshop

In this 2018 New York Times Notable Book, Paige Williams "does for fossils what Susan Orlean did for orchids" (Book Riot) in her account of one Florida man's reckless attempt to sell a dinosaur skeleton from Mongolia--a story "steeped in natural history, human nature, commerce, crime, science, and politics" (Rebecca Skloot). In 2012, a New York auction catalogue boasted an unusual offering: "a superb Tyrannosaurus skeleton." In fact, Lot 49135 consisted of a nearly complete T. bataar, a

close cousin to the most famous animal that ever lived. The fossils now on display in a Manhattan event space had been unearthed in Mongolia, more than 6,000 miles away. At eight-feet high and twenty-four feet long, the specimen was spectacular, and when the gavel sounded, the winning bid was over \$1 million. Eric Prokopi, a thirty-eight-year-old Floridian, was the man who had brought this extraordinary skeleton to market. A onetime collegiate-level swimmer who spent his teenage years diving for shark teeth, Prokopi's singular obsession with fossils fueled a thriving business hunting, preparing, and selling specimens, to clients ranging from natural history museums to avid private collectors like actors Leonardo DiCaprio and Nicolas Cage. But there was a problem. This time, facing financial strain, had Prokopi gone too far? As the T. bataar went to auction, a network of paleontologists alerted the government of Mongolia to the eye-catching lot. An international custody battle ensued, and Prokopi watched his own world unravel. In the tradition of *The Orchid Thief*, *The Dinosaur Artist* is a stunning work of narrative journalism about humans' relationship with natural history and a seemingly intractable conflict between science and commerce. A story that stretches from Florida's Land O' Lakes to the Gobi Desert, *The Dinosaur Artist* illuminates the history of fossil collecting--a murky, sometimes risky business, populated by eccentrics and obsessives, where the lines between poacher and hunter, collector and smuggler, enthusiast and opportunist, can easily blur. In her first book, Paige Williams has given readers an irresistible story that spans continents, cultures, and millennia as she examines the question of who, ultimately, owns the past.

Managing Innovation: New Technology, New Products, and New Services in a Global Economy, 2nd Edition is devoted to providing a better understanding and better management of all of the causes and consequences of change that have technological implications in and around our global organizations. This text is a unique, original contribution and represents a significant alternative to the collection of chapters written by others. The second edition has new cases with a few classics from the first edition that have been retained in response to reader feedback. The key subjects that are included have been significantly updated and treated in greater depth. The number of chapters has been reduced from 12 to 10 so it is easy to adapt to almost any course or training on the subject in any discipline or to any audience. This exceptionally informative book provides a broad perspective on how technological change can be effectively managed in modern organizations. The text explains the conceptual frameworks supported by new and original case studies for start-up companies like Askmen.com, the complex challenges of managing international technology-based companies like NexPress (a joint venture of Kodak and Heidelberg) in the digital printing industry, and corporate sustainability using innovative new product technologies illustrated by the case of Evinrude's launch of the E-tec® outboard motor. John E. Ettl's three decades in the field of innovation as an instructor and researcher bring an exceptional perspective to this subject. His text is unique in its discussion of how technology has transformed the service sector. Few books on technology make the distinction between new offerings in manufacturing and the

service sector which is emphasized in this text.
