NEW YORK TIMES BESTSELLER • A “brilliant [and] entrancing” (The Guardian) journey into the hidden lives of fungi—the great connectors of the living world—and their astonishing and intimate roles in human life, with the power to heal our bodies, expand our minds, and help us address our most urgent environmental problems. “Grand and dizzying in how thoroughly it recalibrates our understanding of the natural world.” —Ed Yong, author of *I Contain Multitudes* ONE OF THE BEST BOOKS OF THE YEAR—Time, BBC Science Focus, The Daily Mail, Geographical, The Times, The Telegraph, New Statesman, London Evening Standard, Science Friday When we think of fungi, we likely think of mushrooms. But mushrooms are only fruiting bodies, analogous to apples on a tree. Most fungi live out of sight, yet make up a massively diverse kingdom of organisms that supports and sustains nearly all living systems. Fungi provide a key to understanding the planet on which we live, and the ways we think, feel, and behave. In *Entangled Life*, the brilliant young biologist Merlin Sheldrake shows us the world from a fungal point of view, providing an exhilarating change of perspective. Sheldrake’s vivid exploration takes us from yeast to psychedelics, to the fungi that range for miles underground and are the largest organisms on the planet, to those that link plants together in complex networks known as the “Wood Wide Web,” to those that infiltrate and manipulate insect bodies with devastating precision. Fungi throw our concepts of individuality and even intelligence into question. They are metabolic masters, earth makers, and key players in most of life’s processes. They can change our minds, heal our bodies, and even help us remediate environmental disaster. By examining fungi on their own terms, Sheldrake reveals how these extraordinary organisms—and our relationships with them—are changing our understanding of how life works. Winner of the Wainwright Prize, the Royal Society Science Book Prize, and the Guild of Food Writers Award • Shortlisted for the British Book Award • Longlisted for the Rathbones Folio Prize

The legends of King Arthur have not only endured for centuries, but also flourished in constant retellings and new stories built around the central themes. With the coming of motion pictures, Arthur was destined to hit the screen. This edition of *Cinema Arthuriana*, revised in 2002, presents 20 essays on the topic of the recurring presence of the legend in film and television from 1904 to 2001. They cover such films as *Excalibur* (1981) and *Monty Python and the Holy Grail* (1975),

television productions such as *The Mists of Avalon* (2001), and French and German films about the quest for the Holy Grail and the other adventures of King Arthur and the Knights of the Round Table.

The earth-shattering conclusion to the legend of Merlin. Returning from his epic journey to Constantinople, Myrddion Merlinus finds Briton in the grip of Uther Pendragon's bloodthirsty war against the Saxons. Coerced into obedience, Myrddion must serve Uther's brother Ambrosius, the High King, in order to spare the lives of his beloved fellow travellers. Ambrosius is an honest and wise ruler and Myrddion's skills are put to good use setting up a spy network while training healers across the land. But when Ambrosius is poisoned, his untimely death propels Myrddion back into the callous hands of Uther Pendragon. The new High King will stop at nothing to force Myrddion to accede to his unthinkable wishes. Myrddion's only solace is the prophecy that his suffering is not in vain. But will he survive the taint of Uther's madness and enable good to come from evil?

Reading the animal text in the landscape of the damned looks at the diverse texts of our everyday world relating to nonhuman animals and examines the meanings we imbibe from them. It describes ways in which we can explore such artefacts, especially from the perspective of groups and individuals with little or no power. This work understands the oppression of nonhuman animals as being part of a spectrum incorporating sexism, racism, xenophobia, economic exploitation and other forms of oppression. The enquiry includes, physical landscapes, the law, women’s rights, history, slavery, language use, economic coercion, farming, animal experimentation and much more. Reading the animal text in the landscape of the damned is an academic work but is accessible, theoretically based but robustly practical and it encourages the reader to take this enquiry further for both themselves and for others.
