Remove the 3 screws, pull the module off (the square tan
colored part). With that off,you can see some connecting pins
on the icemaker, They may need a cleanup befor the new
module goes on.Then reassemble.Take a look at the old
module, you can see the small copper contacts that burn. This
should take care of the smell.

This is definitely a strong metallic smell, more so
than a taste. While I was out walking, it was
intermittent. Seems like if it were from Fukushima or
a plant venting across the lake in Wisconsin, I would
smell it everywhere. However, last year after
Fukushima, I could smell it from town to town as I
traveled for work.

[Metallic Smell Manual Guide](#)

It ' s Like a New Car Smell. Everybody knows the smell of a new car. It ' s a crisp, clean, and somewhat mysterious scent. It ' s often the key factor in confirming that a car is genuinely new, and as it turns out, it ' s actually just the smell of vaguely-toxic chemicals. (These chemicals don ' t pose a serious health risk, but more on that ...
