Metaphorists and the Act of Metaphor

Taylor & Francis

"And it shall be in the last days, saith God, I will pour forth of my Spirit upon all flesh: And your sons and your daughters shall prophesy, And your young men shall see visions, And your old men shall dream dreams: " (Acts 2:17, ASV). There has never been a greater time for God's people to put aside their petty religious insanities and "wake up" to hear "His" voice; whether it comes in the explosive eruption of a volcano, a clap of thunder, or a whisper in your ear in the stillness of

the night. Inside the cover of this book are essential ingredients to hear His voice in the quiet of the night. The WORD says: "and the sheep follow him: for they know his voice" (John 10:4, ASV). Do you know His voice? Perhaps it's time we take the principles found within this book and learn to recognize all the ways that "He" can, and is speaking to us. Pastor Joseph Landreth "Follow Me, and I will make you become fishers of men." (Mark 1:17, NKJV)

A Study of the Use, Function, and Significance of Metaphors in Isaiah 24-27 Cambridge Scholars Publishing
Christian theology has suffered

in modern times by an inability to explain its traditional reliance on metaphor to an audience intellectually formed by empiricism. The author argues that what is needed is not a more literal theology but a better understanding of metaphor. The account of metaphor and religious language offered here not only illuminates the way in which the clergy speak of God, but also contributes to our understanding of the workings of metaphor in scientific theory and other disciplines.

Cognitive linguists have proposed that metaphor is not just a matter of language but of thought, and that metaphorical thought displays a high degree of conventionalization. In order to produce converging evidence for this theory of metaphor, a wide range of data is currently being studied with a large array of methods and techniques.

Finding Metaphor in Grammar and Usage aims to map the field of this development in theory and research from a methodological perspective. It raises the question when exactly evidence for metaphor in language and thought can be said to count as converging. It also goes into the various stages of producing such evidence (conceptualization,

operationalization, data collection and analysis, and interpretation). The book offers systematic discussion of eight distinct areas of metaphor research that emerge as a result of approaching metaphor as part of grammar or usage, language or thought, and symbolic structure or cognitive process.

In this updated edition of his brief, engaging book, Robert J. Fogelin examines figures of speech that concern meaning--irony, hyperbole, understatement, similes, metaphors, and others--to show how they work and to explain their attraction. Building on the ideas of Grice and Tversky, Fogelin contends that figurative language derives its power from its insistence that the reader participate in the text, looking beyond the literal meaning of the figurative language to the meanings that are implied. With examples ranging from Shakespeare, John Donne, and Jane Austen to e.e. cummings, Bessie Smith,

and Monty Python, Fogelin demonstrates that the intellectual and aesthetic force of figurative language is derived from the opportunity it provides for unlimited elaboration. Fogelin presents a modern restatement of the view, first put forward by Aristotle, that metaphors are to be treated as elliptical similes. He then offers a detailed defense of this "comparativist" view of metaphors in response to criticisms that have been brought against it by a series of eminent philosophers. This new edition is updated to reflect more recent work on the topic and will interest philosophers, linguists, and literary theorists. From President Obama's political rhetoric to the bursting of the housing bubble, from conversations to commercials, James Geary shows that every

aspect of our day-to-day experience is molded by metaphor. Geary takes readers from Aristotle's investigation of metaphor right up to the latest neuroscientific insights into how metaphor works in the brain. Witty, persuasive, and original, *Is an Other* explores metaphor's effects on financial decision making, effective advertising, leadership, learning, and more. Romeo's exclamation "It is the East, and Juliet is the sun!" may be one of the most well-known metaphors in literature, but metaphor is more than a device of love-struck poets. As Geary demonstrates, metaphor has leaped off the page and landed with a mighty splash right in the middle of the stream of consciousness.

Supplement to the German/English Dictionary of Idioms Harvard University Press

This book describes the emergence of new meanings in two languages, English and Chinese. Drawing on a corpus methodology, it presents

metaphors as a basic instrument of thinking and cognition studies from a conceptual metaphor perspective, probing the compositional potentiality of “light” in English and Chinese, and highlighting the generative mechanism for word composition through metaphorization. The monograph includes detailed discussions of linguistic corpus construction, linguistic manifestations of metaphorization, the main motivation for the formation of metaphorical meanings, and socio-cultural influence in different languages. It expands the scope of previous studies and shows how conceptual metaphor studies can benefit from the use of a corpus methodology by providing not just a description, but an explanation, of how word composition develops. This book will be of interest to students and researchers

interested in metaphor and intercultural studies, as well as cognitive linguistics, corpus linguistics and contrastive studies in English and Chinese. Revised Edition Greenwood Publishing Group
