## **Teaching Children to Read** Routledge

The need to know why as well as how children and youth respond as they do to reading instruction has guided the selection of this book's content. The second edition of this title, originally published in 1990, has retained and elaborated upon the three major themes previously presented: that reading is a linguistic process; that motivation, the affective domain, may be as important in learning to read as the cognitive domain; and that the reality of learning theory is to be found in the mechanisms of the brain where information is mediated and memory traces are stored. The text integrates views from cognitive psychology, psycholinguistics, and neuropsychology as they relate to reading and writing. A

learning-motivation model is provided to present associative learning, conceptualization, and self-directed reading in a hierarchical relationship with distinct cognitive and affective components. The distinction between beginning and proficient reading is maintained throughout the text. Multifaceted Assessment for Early Childhood Education John Wiley & Sons Provides suggestions and resources for the effective teaching of reading.

Teaching Modern Science Prentice Hall Multifaceted Assessment in Early Childhood is ideal for those on upper-division undergraduate courses and first-level graduate courses in early childhood education assessment. The book covers the various measures used in a range of assessment dimensions, and includes

---

valuable information regarding young children with special needs and English Language Learners, which has rarely been touched upon in other textbooks. The chapters are focused on student accessibility and include practical applications of key concepts. Features and benefits: Covers a range of assessment concepts, including - Formative (uses feedback from learning to adapt teaching) -Summative (i.e. tests, quizzes) -Authentic (focuses on complex/deeper tasks) -Standardized (STAR, SAT) Includes coverage of assessment for English language learners and children with special needs -- topics that are not provided enough coverage in other books (including Wortham, McAfee, Puckett and Mindes). Wright's writing style grabs

and engages the reader in the topic. Two of our reviewers who use Wortham specifically cited Wright's writing style as a reason they would adopt our book. A McAfee reviewer is likely to switch for the same reason.

Measurement and Evaluation in the Schools Guilford Press Comprehensive in scope, this book takes the reader step by step through selecting appropriate measures and integrating data from a variety of sources, such as standardized testing, observations of children and their environments, parent and teacher interviews, and work samples. Practice guidelines are brought to life in case

---

examples that emphasize the importance of collaborating with parents, teachers, and other professionals.

Metropolitan Readiness Tests Macmillan College

- One volume-reference work with approximately 250 entries, organized alphabetically for ease of use and of locating subject matter. Each entry will contain 5-8 references as well as a bibliography of references and suggested readings - An authoritative reference text on school psychology that would appeal to, and be understood by, a broad audience. - Will assist individuals in acquiring a general understanding of some of the theories, practices, and language associated with the field of school psychology

*Equal Educational Opportunity 1971* Prentice Hall

Revises the information in the second edition and presents over 700 new or revised tests. The

Psychology section contains 20 subsections, Education has 54 subsections, and Business has 13 subsections. Does not contain reliability, validity, and normative data. Use the complementary "Test Critiques" series for this information.

**Essentials of Bayley-4 Assessment** MacMillan Publishing Company

Known for its practical, applied approach, the fourth edition of John Venn's *Assessing Student's with Special Needs* continues to focus on how teachers can use assessment as a guide to instruction. This noteworthy revision focuses on what teachers really need to know to include assessment in the curriculum. Coverage includes all of the core information expected of an assessment text, but the book goes far beyond the basics by addressing multicultural considerations, technology and assessment, high-stakes testing, and the reauthorization of IDEA. The book clearly shows

---

how assessment is more than giving a test to a child, but is an essential tool for teachers as they help students achieve, learn, develop, and grow.

*Evaluating Family Programs* SAGE

For courses in Assessment in early childhood education. Assessing Young Children addresses theory and provides illustrations of appropriate practice for prospective teachers, as well as discusses current trends for experienced teachers. It approaches assessment as an integral part of the teaching-learning process. Key components of the assessment system advocated include cultural sensitivity, parent collaboration and a vision of inclusionary practice in all early childhood environments-child care and school. This book reflects the knowledge base of early childhood and early childhood special education.

*Diagnosis and Correction in Reading Instruction* Prentice Hall

This text is designed for use as a main text

in undergraduate and graduate courses in reading diagnosis and correction taught in education departments. This popular introductory text for diagnosing and correcting reading problems is now revised and updated based on the latest tests and research. Using numerous examples and scenarios to illustrate concepts and techniques, it is based on the premise that if diagnosis and correction are practiced as an integral part of daily reading instruction, there will be less of a need for remediation.

**Assessment in Special and Inclusive Education** Cengage Learning

The diverse composition of American families and changing ways of raising our children have become subjects of intense scrutiny by researchers and policymakers in

---

recent years. Shifting demographics and work patterns, growing numbers of women in the work force, teenage pregnancy, single-parent families, and the deinstitutionalization of the elderly, disabled, and mentally ill--all these trends have significantly affected family life. Evaluating Family Programs effectively bridges the gap between researchers and practitioners in order to bring practical, understandable advice to providers of family programs and to program funders and policymakers. Heather B. Weiss and Francine H. Jacobs have collected in this volume works which move outside the traditional approaches of their disciplines to create new models for delivering and evaluating services. This sets a mood of genuine inquiry and excitement about successful aspects of programs while maintaining openness about the limitations of both research and practice. By expanding the research model, this work is an attempt to understand reciprocal influences of extended family, culture, community, and social institutions. It urges those who advocate program accountability to understand that not all types of evaluations are appropriate for all programs, and it notes that limitations in current evaluation technologies make it difficult to evaluate outcomes. Evaluating Family Programs reminds the reader that in order to develop sound family policy we must look at children and families in context. Because policymakers, program administrators, and

---

informed citizens have come to rely more upon the results of evaluation research, we must improve our methods while not losing sight of its limitations. It is a thought-provoking contribution to the efforts of those who seek to support the American family with compassion, understanding, and realism.

Current information about tests and testing procedures is provided for school district staff, particularly in districts without specially trained testing directors. Practical information is given about selecting and administering tests and about reporting results effectively. This guide opens with a discussion of the basic principles of testing. The various types of district-level tests are described, and different types of test scores are presented. The advantages and limitations of certain types of tests and scores are reviewed. The viewpoints of measurement experts on important issues in testing are expressed in the following chapters: (1) "Common Misuses of

---

Standardized Tests" (Eric Gardner); (2) "Preparing Students To Take Standardized Achievement Tests" (William A. Mehrens); (3) "Matching Your Curriculum and Standardized Tests" (Jane C. Conoley); (4) "Using Customized Standardized Tests" (Paul L. Williams); (5) "Interpreting Test Scores for Compensatory Education Students" (Gary Echternacht); and (6) "Working with the Press" (Allan Hartman). Four additional discussions are appended: "Finding Information about Standardized Tests" (Lawrence M. Rudner and Kathryn Dorko); Organizations That Provide Test Information" (Ronald T. C. Boyd); "Putting Test Scores in Perspective: Communicating a Complete Report Card for Your Schools" (M. Kevin Matter); and "Major

Achievement Tests and Their Characteristics" (Northwest Regional Education Laboratory). Names and addresses of major test publishers, and a glossary of testing terms are also included. (SLD)

*Reading--from Words to Multiple Texts* Allyn & Bacon

Providing a comprehensive overview of research into reading processes from word identification to the comprehension of multiple texts, acknowledged leaders in the field present the state of the art and current controversies in the field.

Assessing Young Children Routledge  
Administer and apply the Bayley-4 Scales of Infant and Toddler Development with confidence In Essentials of Bayley 4 Assessment, a distinguished team of authors

---

delivers state-of-the-art guidelines for the application of the new Bayley 4 test of infant and toddler development. The resource offers a comprehensive guide to administering, scoring, interpreting, and applying the test. The resource provides key updates made since the publication of the previous version of the test, such as: Updated administration and scoring guidance, content updates, new norms and clinical studies, and shortened administration time Instruction on a Digital Delivery Option of the Bayley 4 (i.e., Q-interactive) New illustrative case studies and examples of Bayley 4 reports. Written for developmental practitioners, school and clinical psychologists, pediatricians, pediatric neuropsychologists, speech-language pathologists, occupational therapists, and physical therapists, *Essentials of Bayley 4* is also an indispensable resource for university

professors and students in training in assessment related fields.

**Hearings, Reports, Public Laws** Plural Publishing

This text presents a uniquely practical approach to the topic of Assessment in Special Education. The authors organize the material into a "real-world story," by having each part and chapter of the book reflect the linear chronology of the assessment process used in schools. Unlike other books, this book is organized chronologically to present the overall process in a "straight line" - a practical and useful pedagogy in itself for the novice teacher. The text provides the practical tools necessary for a new teacher to understand the process of assessment in schools and then learn how to put it all together. It provides future special educators comprehensive coverage of the latest

---

tests and evaluation procedures for all areas of  
exceptionality - for every age group - for  
students with mild, moderate and severe  
disabilities.
