For a whole generation of car enthusiasts, Triumph was the manufacturer to turn to when buying a sports car. Whether it was a Spitfire or GT6 - or the more costly TR models - this Coventry manufacturer was the sports car king during the twentieth century. Now that these machines are fully fledged classics, nothing has changed. While the Spitfire has the MGB as a formidable adversary, the GT6 is still in a class of its own. Triumph Spitfire and GT6 details the history and development of these classic cars, with specification guides for each of the five Spitfire derivatives and three GT6 models. Topics covered include the development and production of the five Spitfire derivatives from 1962 - 1980, the Spitfire 4, 4 Mk2, Mk3, MkIV and 1500; the GT6 models from 1966-1973, the Mk1, Mk2 and Mk3; the Spitfire and GT6 in motorsport - 24 Hours Le Mans, Alpine Rally and Tour de France, and racing in the US; full buying guide and tips on modifying, with colour and trim options, and details of optional extras available for each model. Also includes an insight into what the press thought of each Spitfire and GT6 derivative, with pages devoted to how the cars were marketed. Superbly illustrated with 291 colour photographs.

This book is essential reading for every MGB enthusiast. The mechanical aspects and the restoration of the vehicle have been written about in numerous publications but the so often maligned electrical systems has never before been comprehensively covered. For those new to vehicle electrical systems the book provides a simple primer using mechanical analogies. Each system in the car has its own chapter, with simple and uncluttered circuit diagrams in which each wire can be seen in its real colours. More than a how-to-do guide, the book also explains the " why " of each system and procedure, aiding diagnostics when

things don ' t go quite as they should. The many fault finding guides help pin those elusive problems down. For those wishing to improve the car for reliability and safety.

The Great Cars series returns with an in-depth look at the 1963 Lightweight Jaguar E-type, chassis number 49 FXN. This Porter Press series selects individual vehicles that stand out in the racing world, and commits to a full biography of them. This luminary among Jaguar Lightweight E-types made its race debut at the Nurburgring, freshly modified for aerodynamics and with an incredible engine developed by masterminds Dr. Samir Klat and Prof. Harry Watson. Peter Lumsden and Peter Sargent proved its high-speed potential by running third in the GT class at Le Mans the next year, and three months later, it was the best-placed E-type at the Tourist Trophy at Goodwood, as well as fifth in the GT class. 49 FXN ' s successes go on, and you ' ll see them all in full across nearly 300 period images, many previously unpublished, and plenty of full color studio photography.

Cleanroom software engineering is a process for developing and certifying high-reliability software. Combining theory-based engineering technologies in project management, incremental development, software specification and design, correctness verification, and statistical quality certification, the Cleanroom process answers today's call for more reliable software and provides methods for more cost-effective software development. Cleanroom originated with Harlan D. Mills, an IBM Fellow and a visionary in software engineering. Written by colleagues of Mills and some of the most experienced developers and practitioners of Cleanroom, Cleanroom Software Engineering provides a roadmap for software management, development, and testing as disciplined engineering practices. This book serves both as an introduction for those new to Cleanroom and as a reference guide for the growing practitioner community. Readers will discover a proven way to raise both quality and productivity in their software-intensive products, while reducing costs. Highlights Explains basic Cleanroom theory Introduces the sequence-based specification method Elaborates the full management, development, and certification process in a Cleanroom Reference Model (CRM) Shows how the Cleanroom process dovetails with the SEI's Capability Maturity Model for Software (CMM) Includes a large case study to illustrate how Cleanroom methods scale up to large projects.

Having established a good base for selling cars the MG Company changed the styling for the TD into a much more comfortable and modern vehicle. Again the sales exploded and in three years built nearly three times the number of TC the previous year. The extra boost give by the Mk II kept it going until the TF arrived. This had an even more drastic styling change and not only was it not appreciated, despite a larger engine being fitted, it did not keep up with the current vogue for all enveloping bodies. This only lasted two years until the radically different MGA appeared in 1955. This is a book of contemporary road tests, new model introductions, trials, racing record breaking, service data, technical & performance data. Models covered include:- TD, MkII, TD Record Breaker, Lester-MG, Cooper-MG, TF1250, TF1500, EX179.
