If you come across  
something that you  
see as hard or  
others identify as  
hard and pass by it  
so coolly, then you  
indeed will have no  
issues when it  
comes to something

they see as small.  
Below is what is  
considered the  
hardest  
microbiology exam  
and is derived from  
your notes and book  
in chapter 8. Think  
you can pass it?

In this test, wafers containing antibiotics are placed on an agar plate where bacteria have been placed, and the plate is left to incubate. If an antibiotic stops the bacteria from growing or kills the bacteria, there will be an area around the wafer where the bacteria have not grown enough to be visible.

the heat of 115 C acting on an organism for 70 minutes is equivalent to heat of 125 C

acting on an organism for only 7 minutes; that is applying a higher temperature for a shorter time may kill the same number of microbes as a lower temperature for a longer time.
