Microeconomics Cengage Learning "To change the way students see the world: this is my goal in teaching economics and in writing this book. Three facts about students are my guiding principles. First, they want to learn, but they are over-whelmed by the volume of claims on their time and energy. So, they must see the relevance to their lives and future careers of what they are being asked to learn. Second, students want to get it, and get it quickly. So, they must be presented with clear and succinct explanations. And third, students want to make sense of today's world and be better prepared for life after school. So, they must be

shown how to apply the timeless principles of economics and its models to illuminate and provide a guide to understanding today's events and issues, and the future challenges they are likely to encounter. The organization of this text arises directly from these guiding principles"--

The goal of Thomas and Maurice's Managerial Economics is to teach students the economic way of thinking about business decision and strategy. This edition continues to develop critical thinking skills and provides students with a logical way of analysing both the routine decisions of managing the daily operations of a business as well as the longer-run strategic plans that seek to manipulate the actions and reactions of rival firms.

Managerial Economics is a self-contained textbook that requires no previous training in economics. While maintaining a rigorous style, this book is designed to be one of the most accessible books in managerial economics from which to teach and learn because of its clarity of presentation and strong end of chapter problems. Rather than parading students quickly through every interesting or new topic in microeconomics and industrial organization, this 11th edition instead carefully develops and applies the most useful concepts for business decision making and strategic planning.
