...

Evolution is  
change in the  
heritable traits  
of biological  
populations  
over  
successive gen  
erations. Evolut  
ionary  
processes give  
rise to  
diversity at  
every level of  
biological  
organisation,  
including the  
levels of  
species,

individual  
organisms, and  
molecules.

What are the  
answers to the  
microevolution  
gizmo - Answers

Observe the effect  
of predators on a  
population of  
parrots with three  
possible genotypes.  
The initial  
percentages and  
fitness levels of  
each genotype can  
be set. Determine  
how initial fitness  
levels affect  
genotype and allele  
frequencies  
through several  
generations.  
Compare scenarios  
in which a  
dominant allele is  
deleterious, a  
recessive allele is  
deleterious, and  
the heterozygous  
individual ...

Gizmo Warm-up  
If natural selection  
does not favor one  
trait over another,  
the frequencies of  
various alleles in a  
population will  
tend to be stable

time. But what  
happens when one  
allele confers an  
advantage or  
disadvantage to an  
individual? These  
scenarios and  
others can be  
explored with the  
Microevolution  
Gizmo™. 1.
