fascinating and  
provocative new way  
of looking at the  
things we use and  
the spaces we  
inhabit, and a call  
to imagine a better-  
designed world for  
us all. Furniture  
and tools, kitchens  
and campuses and  
city streets—nearly  
everything human  
beings make and use  
is assistive  
technology, meant to  
bridge the gap

between body and  
world. Yet unless, or  
until, a misfit  
between our own body  
and the world is  
acute enough to be  
understood as  
disability, we may  
never stop to  
consider—or  
reconsider—the hidden  
assumptions on which  
our everyday  
environment is built.  
In a series of vivid  
stories drawn from  
the lived experience  
of disability and the  
ideas and innovations  
that have emerged  
from it—from cyborg  
arms to customizable  
cardboard chairs to deaf  
architecture—Sara  
Hendren invites us to  
rethink the things  
and settings we live  
with. What might  
assistance based on

the body's stunning capacity for adaptation—rather than a rigid insistence on “normalcy”—look like? Can we foster interdependent, not just independent, living? How do we creatively engineer public spaces that allow us all to navigate our common terrain? By rendering familiar objects and environments newly strange and wondrous, *What Can a Body Do?* helps us imagine a future that will better meet the extraordinary range of our collective needs and desires.

A moving 9-11 story about the USS New York, a navy ship with a bow made from a World Trade Center Towers beam. Following the events of September 11, 2001, a beam from the World Trade Center Towers was given to the United States Navy. The beam was driven from New York to a foundry in Louisiana, where the seven and a half tons of steel, which had once been a beam in the World Trade Center, became a navy ship's bow. Powerful text from Janet Nolan is paired with stunning illustrations from New York Times best-selling illustrator Thomas Gonzalez (14 Cows for America) in this inspiring story that reveals how something remarkable can emerge from a devastating event. Also includes details on shipbuilding. A beautiful book, perfect for American history and 9-11 studies.

## Crossing the Line

This CD-ROM provides students in the whole animal Biology courses such as General Zoology, Invertebrate Zoology and Vertebrate Zoology with an interactive guide to the specimens and materials that they will be studying in their laboratory and lecture sessions. Lab modules are the biggest components of Digital Zoology, and each contain illustrations, photographs and annotations of the major structure of organisms and microscope slides commercially available from the suppliers used by high schools and universities. Lab modules are combined with explanations of the various animal groups and interactive cladograms that allow students to investigate the major evolutionary events that have given rise to the tremendous diversity of animals that we find on the planet.
