The Investigating Third Grade workbook encourages children to solve puzzles, find evidence, and crack a case using math and language arts skills. The activities build essential skills such as:

-vocabulary -grammar

-multiplication -division Perfect for at home or on-the-go! Engaging third graders in learning at home can be a challenge—Investigating Third Grade makes it easy. Unlike other math and language arts activity workbooks, this educational mystery workbook includes 200 unique activities, a special Detective’s Notebook, and a mystery story. Young sleuths will develop the math, language arts, and problem-solving skills they need for success in, and out, of the classroom. Far from the typical “skill-and-drill” workbook, each unique title in the Investigating series helps sharpen school skills while children solve an intriguing “whodunit” mystery story.

Captivating and creative, the series offers a unique learning experience that appeals to a child’s natural curiosity.

Become a cell expert.  
Our resource  
demonstrates why cells  
are the building  
blocks of life. Start  
your breakdown by  
first identifying what  
a cell is. Then,  
compare single-celled  
and multicellular  
organisms. Introduce  
the concept of DNA  
before exploring the

different parts of a  
cell. From there, take  
a look at the jobs of  
these parts. Move on to  
cell reproduction by  
exploring mitosis and  
meiosis. Dissect plant  
and animal cells to see  
how they work and how  
they are similar. Look  
at the big picture by  
seeing how cells become  
organisms. Finally,  
learn how particles  
move through cell  
membranes with  
diffusion and osmosis.
