Create real-world enterprise solutions with NAV, Cloud, and the Microsoft stack
About This Book
Integrate NAV with various offerings of the Microsoft stack to create enterprise-ready and service-oriented solutions Use Power BI and Universal Windows Platform for effective data analysis and real-time

tracking with NAV
Discover the services offered by Microsoft Azure and implement them in different industries using real-world case scenarios
Who This Book Is For
This book is for NAV developers and solution architects who need to implement real-world enterprise solutions based on Microsoft Dynamics NAV. Knowledge of the NAV programming language (C/AL) and C# language is recommended. Knowledge of ASP.NET and Visual Studio development would help, but is not necessary. What You Will Learn
Configure NAV Web Services and create external applications with Visual Studio, .NET, and .NET Core
Solve technical architectural problems by implementing enterprise solutions with NAV
Develop applications and solutions with Microsoft Dynamics NAV and the Microsoft technology stack
Create a Power BI dashboard for rich reporting and NAV data analysis
Find out how to transmit your device location from a UWP application to NAV in order to implement a distributed solution for managing couriers in a sales company
Make the most of Microsoft Azure and its services
Create enterprise solutions with NAV by using Azure App Service
Use Azure Service Bus for managing distributed NAV applications
In Detail
Implementing

The exclusive tear-out Cram Sheet contains acronyms, tips, and memory joggers to improve recall immediately before the exam.

Building Distributed Applications with Visual Basic.NET
Morgan & Claypool

Microsoft Windows Server is a multi-purpose server designed to increase reliability and flexibility of a network infrastructure.

Windows Server is the paramount tool used by enterprises in their datacenter and desktop strategy. The most recent versions of Windows Server also provide both server and client virtualization. Its ubiquity in the enterprise results in the need for networking professionals who

know how to plan, design, implement, operate, and troubleshoot networks relying on Windows Server. Microsoft Learning is preparing the next round of its Windows Server Certification program with exams covering the new version of the software, Windows Server 2012. The exams and certification path change significantly from the previous version of Windows Server. This provides an opportunity for the MS line to capitalize on the dual disruption of brand-new software and brand-new certifications.
