Teaching is a demanding profession as there is constant fluctuation and evolution. A portion of teaching is the ability to be able to adapt to various environments, especially shifting from in-person instruction to online practices. Over the last few years, early childhood and elementary school classrooms have been thrust into hybrid and remote learning environments, and it is vital that educators and institutions adapt to new practices and create various outlets for teachers to be able to more adequately reach their young audience. The Handbook of Research on Adapting Remote Learning Practices for Early Childhood and Elementary School Classrooms is a critical resource to assist teachers as they develop online teaching practices and work to cater to young students so that they can receive the strongest benefits from their education. Through coverage of topics such as hybrid learning and parental involvement, paired with sample lesson plans, course formats, concepts, ideas, and additional components to further the body of research pertaining to remote learning, this book is tremendously beneficial to administrators, researchers, academicians, practitioners, instructors, and students.

Hollywood Online provides a historical account of motion picture websites from 1993 to 2008 and their marketing function as industrial advertisements for video and other media in the digital age. The Blair Witch Project is the most important example of online film promotion in cinema history. Over the last thirty years only a small number of major and independent distributors have converted internet-created buzz into box-

office revenues with similar levels of success. Yet readings of how the film's internet campaign broke new ground in the summer of 1999 tend to minimize, overlook or ignore the significance of other online film promotions. Similarly, claims that Blair initiated a cycle of imitators have been repeated in film publications and academic studies for more than two decades. This book challenges three major narratives in studies about online film marketing: Hollywood's major studios and independents had no significant relationship to the internet in the 1990s; online film promotions only took off after 1999 because of Blair; and Hollywood cashed-in by initiating a cycle of imitators and scaling up corporate activities online. Hollywood Online tests these assumptions by exploring internet marketing up to and including the film's success online (Pre-Blair, 1993-9), then by examining the period immediately after Blair (Post-Blair, 2000-8) which broadly coincides with the rise and decline of DVD, as well as the emergence of the social media sites MySpace, Facebook and Twitter.

This book tackles all the common annoyances your network dishes up -- whether it's wired or wireless, Mac or PC. It guides you through common home networking glitches, including file sharing, printing, security, and more.  
*Contemporary Business Communication* Shell Education  
Students don't have to be convinced of the need for competent communication skills. By the time they enter business communication classes, students know enough about the business environment to appreciate the critical role communication plays in the contemporary organization; they're also aware of the role communication will play in helping them secure an internship or get a job and be successful at work. To sustain this inherent interest, students need a textbook that is current, fast-paced, and interesting, just like business itself. Thus, a major objective of [the book] is to present comprehensive coverage of real-world concepts in an interesting and lively manner. This edition has been extensively revised to provide students with the skills they need to communicate effectively in the complex and ever-changing contemporary work environment. The revision was based on helpful feedback received from the current users around the country(and, indeed, around the English-speaking world), changes in the discipline, and, especially, changes in the workplace itself. The following discussion highlights the features of this complete learning and teaching system: Business communication-in context--technology-centered--Work-team communication--Spotlights on contemporary issues--The 3Ps (problem, process, and porduct) model--Annotated models and checklists--basic skills first--Unprecedented instructor support--Additional student support materials.-Pref.
