Access database engine cannot find the input table -

Office

The Microsoft Office Access database engine cannot find the input table or query 'MSysBDCMetadata'. Make sure that it exists and that its name is spelled correctly. Cause.

This issue occurs because the BDC system tables that you linked to are not included in the template that you saved from the database.

Workaround .

Microsoft provides programming examples for illustration only, without ...

Office 365: Microsoft Access Database Engine could not ...

1. Start Microsoft Access on your local machine and open the Access Web application. 2. Click File and click the "View and edit database properties" link on the upper right. On the General tab of the dialog you will see the

location of the local database file. 3. Record the location of the *.accdb file and close Access. 4. In the Sync All ...
