The conflict and contact between Muslims and Christians in the Middle Ages is among the most important but least appreciated developments of the period from the seventh to the fourteenth century. Michael Frassetto argues that the relationship between these two faiths during the Middle Ages was essential to the cultural and religious developments of Christianity and Islam—even as Christians and Muslims often found themselves engaged in violent conflict. Frassetto traces the history of those conflicts and argues that these holy wars helped create the identity that defined the essential characteristics of Christians and Muslims. The polemic works that often accompanied these holy wars was important, Frassetto contends, because by defining the essential evil of the enemy, Christian authors were also defining their own beliefs and practices. Holy war was not the only defining element of the relationship between Christians and Muslims during the Middle Ages, and Frassetto explains that everyday contacts between Christian and Muslim leaders and scholars generated more peaceful relations and shaped the literary, intellectual, and religious culture that defined medieval and even modern Christianity and Islam.

The Divine Office--the cycle of daily worship other than the Mass--is the richest source of liturgical texts and music from the Latin Middle Ages. However, its richness, the great diversity of its manuscripts, and its many variations from community to community have made it difficult to study, and it remains largely unexplored terrain. This volume is a practical guide to the Divine Office for students and scholars throughout the field of medieval studies. The book surveys the many questions related to the Office and presents the leading analytical tools and research methods now used in the field. Beginning with the Office in the early Middle Ages, the book covers manuscript sources and their contents; regional developments and variations; the relationship between the Office, the Mass, and other ceremonies and repertoires; and the deep links between the Office and medieval hagiography. The book concludes with a discussion of recent technical advances for handling the enormous amounts of evidence on the Office and its performance, in particular CANTUS, the vast electronic database developed by Ruth Steiner of Catholic University for the analysis of chant repertoires. The Divine Office in the Latin Middle Ages is an essential resource for anyone studying medieval liturgy. Its accessible style and broad coverage make it an important basic reference for a wide range of students and scholars in art history, religious studies, social history, literature, musicology, and theology.

Contesting the Middle Ages is a thorough exploration of recent arguments surrounding nine hotly debated topics: the decline and fall of Rome, the Viking invasions, the Crusades, the persecution of minorities, sexuality in the Middle Ages, women within medieval society, intellectual and environmental history, the Black Death, and, lastly, the waning of the Middle Ages. The historiography of the Middle Ages, a term in itself controversial amongst medieval historians, has been continuously debated and rewritten for centuries. In each chapter, John Aberth sets out key historiographical debates in an engaging and informative way, encouraging students to consider the process of writing about history and prompting them to ask questions even of already thoroughly debated subjects, such as why the Roman Empire fell, or what significance the Black Death had both in the late Middle Ages and beyond. Sparking discussion and inspiring examination of the past and its ongoing significance in modern life, Contesting the Middle Ages is essential reading for students of medieval history and historiography. The Catholicism Answer Book Farrar, Straus and Giroux
On Faith, Rationality, and the Other in the Late Middle Ages is an investigation of Nicholas of Cusa that seeks a deeper understanding of this important medieval intellectual and his importance for us today. One of Gergely Bakos's primary aims in this study is to understand Nicholas of Cusa's important and underexamined dimensions of his approach to dialogue with Islam. The framework and the methodology that informs this investigation was inspired by the late

Professor Jos Decorte (1954-2001), a Flemish philosopher and mediaevalist at the Catholic University of Leuven in Belgium. Bakos carefully exposit his method of approaching medieval thought (Part One) and then applies and tests this method in practice (Part Two). The most extensive part of this study offers a sketch of the historical background of Nicholas's dialogue with Islam and investigates what possibilities this approach offers. All of this is placed in dialogue with two other mediaeval approaches to Islam (Thomas Aquinas and Ramon Lull). The final chapters discuss Nicholas of Cusa's project from a perspective offered by his mystical theology. The book culminates in an exploration of the possibilities of Nicholas of Cusa's approach by testing the framework of the study. Finally, the author evaluates the application of his own approach (Part Three). The study ultimately has two purposes: to contribute to a better understanding of Nicholas of Cusa's thought, on the one hand, and, on the other, to test a particular methodology and interpretative framework for the understanding of mediaeval culture.

Lovesickness in the Middle Ages Vandenhoeck & Ruprecht
This clear and comprehensive text covers the Middle Ages from the classical era to the late medieval period.

Distinguished historian John Riddle provides a cogent analysis of the rulers, wars, and events—both natural and human—that defined the medieval era. Taking a broad geographical perspective, Riddle includes northern and eastern Europe, Byzantine civilization, and the Islamic states. Each, he convincingly shows, offered values and

institutions—religious devotion, toleration and intolerance, laws, ways of thinking, and changing roles of women—that presaged modernity. In addition to traditional topics of pen, sword, and word, the author explores other driving forces such as science, religion, and technology in ways that previous textbooks have not. He also examines such often-overlooked issues as medieval gender roles and medicine and seminal events such as the crusades from the vantage point of both Muslims and eastern and western Christians. In addition to a thorough chronological narrative, the text offers humanizing features to engage students. Each chapter opens with a theme-setting vignette about the lives of ordinary and extraordinary people. The book also introduces students to key controversies and themes in historiography by featuring in each chapter a prominent medieval historian and how his or her ideas have shaped contemporary thinking about the Middle Ages. Richly illustrated with color plates, this lively, engaging book will immerse readers in the medieval world, an era that shaped the foundation for the modern world.

Dreams and visions played important roles in the
Christian cultures of the early middle ages. But not
only did tradition and authoritative texts teach that
some dreams were divine: some also pointed out
that this was not always the case. Exploring a broad
range of narrative sources and manuscripts, Jesse
Keskiaho investigates how the teachings of
Augustine of Hippo and Pope Gregory the Great on
dreams and visions were read and used in different
contexts. Keskiaho argues that the early medieval
processes of reception in a sense created patristic
opinion about dreams and visions, resulting in a set
of authoritative ideas that could be used both to
defend and to question reports of individual
visionary experiences. This book is a major
contribution to discussions about the intellectual
place of dreams and visions in the early middle ages,
and underlines the creative nature of early medieval
engagement with authoritative texts.
