This book contains peer-reviewed papers presented at the 10th International Conference on Energy Efficiency in Domestic Appliances and Lighting (EEDAL'19), held in Jinan, China from 6-8 November 2019. Energy efficiency helps to mitigate CO2 emissions and at the same time increases the security of energy supply. Energy efficiency is

recognized as the cleanest, quickest and cheapest energy source. Not only this, but energy efficiency brings several additional benefits for society and end-users, such as lower energy costs, reduced local pollution, better outdoor and indoor air quality, etc. However, in some sectors, such as the residential sector, barriers to investments in energy efficiency remain. Legislation adopted in several jurisdictions (EU, Japan, USA, China, India, Australia, Brazil, etc.) helps in removing barriers and fosters investments in energy efficiency. These initiatives complement innovative financing schemes for energy efficiency, the provision of energy services by energy service companies and different types of information programs. At the same time, progress in appliance technologies and in solid state lighting offer high levels of efficiency. LED lighting is an example. As with previous conferences in this series, EEDAL ' 19 provided a unique forum to discuss and debate the latest developments in energy and environmental impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer behavior, and policies and programs. EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.

Class reunions: a time for memories—good, bad, and, as Virgil Flowers is about to find out, deadly—in this New York Times bestselling thriller from John Sandford. Virgil knows the town of Tripton, Minnesota, a little too well. A few years back, he investigated the corrupt—and as it turned out, homicidal—local school board, and now the town 's back in view with more alarming news: A woman 's been found dead, frozen in a block of ice. There 's a possibility that it might be connected to a high school class of twenty years ago that has a mid-

winter reunion coming up, and so, wrapping his coat a little tighter, Virgil begins to dig into twenty years' worth of traumas, feuds, and bad blood. In the process, one thing becomes increasingly clear to him. It's true what they say: High school is murder. The Australian Official Journal of Trademarks Zebra Books

This book covers all details for a successful control and elimination strategy against propagation of deadly liver and intestinal flukes of the genus *Schistosoma* in China. Cancer due to schistosomiasis is still common in subtropical countries and affords hundreds of thousands of human and animal deaths per year. Expert authors pay close attention to the biology and morphologic aspects of *Schistosoma* species as well as the history and status quo of schistosomiasis epidemiology. In a unique way, the present work illustrates the need to involve strategic measurements, and to control both adult worms and larval parasite stages. With a special focus on Jiangxi Province, the authors present an effective management plan, ranging from intermediate host snail control to diagnostic tools, medical aid, as well as public health education. This approach from China can be used as

blueprint in other countries hit by the same worm infections. The contents of this book will thus be meaningful for academics and practitioners in the fields of parasitology, public health, as well as human and veterinary medicine.
