It's no secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship. However, those demands won't be met

without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make such a shift, project-based learning (PBL) offers a proven framework to help students be better equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, "I don't know. Let's find out together." In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally presented in Setting the Standard for Project Based Learning and explore the seven practices integral to Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related series of free videos provide a detailed look at what's happening in PBL classrooms from the perspective of the Project Based Teacher. Let's find out together. Feminist Critical Policy Analysis: A perspective from post-secondary education Psychology Press

Solon (c 658-558 BC) is famous as both statesman and poet but also, and above all, as the paramount lawmaker of ancient Athens. Though his works survive only in fragments, we know from the writings of Herodotus and Plutarch that his constitutional reforms against the venality, greed and political power-play of Attica's tyrants and noblemen were

hugely influential- and may even be said to have laid the foundations of western democracy. Solon's legal injunctions covered the widest range of topics and issues: economics and labour; sexual morality; social issues; and society and politics. Yet despite their fame and influence (and Solon's life and work generated a lively reception history), no complete edition of these writings has yet been published. This book offers the definitive critical edition of Solon's laws that has long been needed. It comprises the original Greek fragments with English translations,

commentaries, a comprehensive introduction and important comparative Latin texts. It will be enthusiastically welcomed by specialists in ancient Greek language and history.

and a collection of ten research anticorrosion agents.

articles covering fundamental studies and applications of different metal oxide films.

Mesoporous materials have been widely investigated and applied in many technological applications owing to their outstanding structural and physical properties. In this book, important developments in this fast-moving field are presented from various research groups around the world. Different preparation methods and applications of these novel and interesting materials have been reported, and it was demonstrated that mesoporosity has a direct impact on the properties and potential applications of such materials. The potential use of mesoporous metal oxide films and coatings with different morphology and structures is demonstrated in many technological applications, particularly chemical and electrochemical sensors, supercapacitors, solar cells, photoelectrodes, bioceramics, photonic switches, and

Over the last two decades, and in the wake of increases in recorded crime and other social changes, British criminal justice policy has become increasingly politicised as an index of governments' competence. New and worrying developments, such as the inexorable rise of the US prison population and the rising force of penal severity, seem unstoppable in the face of popular anxiety about crime. But is this inevitable? Nicola Lacey argues that harsh 'penal populism' is not the inevitable fate of all contemporary democracies. Notwithstanding a degree of convergence, globalisation has left many of the key institutional differences between national systems intact, and

these help to explain the striking differences in the capacity for penal tolerance in otherwise relatively similar societies. Only by understanding the institutional preconditions for a tolerant criminal justice system can we think clearly about the possible options for reform within particular systems.

Increasingly used as an adjunctive tool in the diagnosis and management of ear disease, middle ear endoscopy has the potential to decrease patient morbidity, prevent disease recurrence, and reduce costs. Its capacity to uncover hidden anatomy within the small dimensions of the ear has made it essential for functional surgery, allowing surgeons to preserve key anatomic structures such as the

cochlea and facial nerve.

Now for the first time, the physicians who pioneered this groundbreaking minimally invasive technique review its indications, advantages, disadvantages, and surgical approaches: Written by the foremost leaders in the field, all members of the International Working Group on Endoscopic Ear Surgery Features nearly 1,000 intraoperative endoscopic images filmed with high-definition cameras, plus outstanding line drawings that aid in understanding all concepts Comprehensively covers the field, including chapters on endoscopic and combined endoscopic-microscopic management of cholesteatoma, surgical restoration of middle ear ventilation, myringoplasty, Meniere disease, tympanoplasty and stapes surgery, revision surgery,

and much more

Demonstrates state-of-the-art endoscopic procedures in 19 instructive videos

From the unique anatomy and pathophysiology of the middle ear through diagnosis, surgical indications, procedures, and instrumentation, this book is indispensable for all otolaryngologists and neurotologists. It offers a full picture of the field today, as well as exploring the future possibilities of ear endoscopes alone or in combination with operative microscopes for the most effective treatment of middle ear pathologies.

A Little Piece of Light, a memoir of survival, redemption, hope, and sisterhood from a bold new voice on the front lines of the criminal justice reform movement. Like so many women before her and so many women yet to come, Donna Hylton's early life was a nightmare of abuse that left her feeling alone and convinced of her worthlessness. In 1986, she took part in a horrific act and was sentenced to 25 years to life for kidnapping and second-degree murder. It seemed that Donna had reached the end--at age 19, due to her own mistakes and bad choices, her life was over. A Little Piece of Light tells the heartfelt, often harrowing tale of Donna's journey back to life as she faced the truth about

the crime that locked her away for 27 years...and celebrated the family she found inside prison that ultimately saved her. Behind the bars of Bedford Hills Correctional Facility, alongside this generation's most infamous criminals, Donna learned to fight, then thrive. For the first time in her life, she realized she was not alone in the abuse and misogyny she experienced--and she was also not alone in fighting back. Since her release in 2012, Donna has emerged as a leading advocate for criminal justice reform and women's rights who speaks to politicians, violent abusers, prison officials, victims, and students to tell her story. But it's not her story alone, she is quick to say. She also represents the stories of thousands of women who have been unable to speak for

themselves, until now.

This text sets out to challenge the traditional power basis of the policy decision makers in education. It contests that others who have an equal right to be consulted and have their opinions known have been silenced, declared irrelevant, postponed and otherwise ignored. Policies have thus been formed and implemented without even a cursory feminist critical glance. The chapters in this text illustrate how to incorporate critical and feminist lenses and thus create policies to meet the lived realities, the needs, aspirations and values of women and girls. A particular focus is the primary and secondary sectors of education.
