From one of the nation's preeminent experts on women and emotion, a breakthrough new book about how to stop negative thinking and become more productive It's no surprise that our fast-paced, overly self-analytical culture is pushing many people-especially women-to spend countless hours thinking about negative ideas, feelings, and experiences. Renowned psychologist Dr. Susan Nolen-Hoeksema calls this overthinking, and her groundbreaking research shows that an increasing number of women-more than half of those in her extensive study-are doing it too much and too often, hindering their ability to lead a satisfying life. Overthinking can be anything from fretting about the big questions such as "What am I doing with my life?" to losing sleep over a friend's innocent comment. It is causing many women to end up sad, anxious, or seriously depressed, and Nolen-Hoeksema challenges the assumption-heralded by so many pop-psychology pundits of the last several decades-that constantly expressing and analyzing our emotions is a good thing. In Women Who Think Too Much, Nolen-Hoeksema shows us what causes so many women to be overthinkers and provides concrete strategies that can be used to escape these negative thoughts, move to higher ground, and live more productively. Women Who Think Too Much will change lives and is destined to become a self-help classic.

From Snow White to Shrek, from Fred Flintstone to SpongeBob SquarePants, the design of a character conveys personality before a single word of dialogue is spoken. Designing Characters with Personality shows artists how to create a distinctive character, then place that character in context within a script, establish hierarchy, and maximize the impact of pose and expression. Practical exercises help readers put everything together to make their new characters sparkle. Lessons from the author, who designed the dragon Mushu (voiced by Eddie Murphy) in Disney's Mulan—plus big-name experts in film, TV, video games, and graphic novels—make a complex subject accessible to every artist.

A comprehensive guide to the conceptual, mathematical, and implementational aspects of analyzing electrical brain signals, including data from MEG, EEG, and LFP recordings. This book offers a comprehensive guide to the theory and practice of analyzing electrical brain signals. It explains the conceptual, mathematical, and implementational (via Matlab programming) aspects of time-, time-frequency- and synchronization-based analyses of magnetoencephalography (MEG), electroencephalography (EEG), and local field potential (LFP) recordings from humans and nonhuman animals. It is the only book on the topic that covers both the theoretical background and the implementation in language that can be understood by readers without extensive formal training in mathematics, including cognitive scientists, neuroscientists, and psychologists. Readers who go through the book chapter by chapter and implement the examples in Matlab will develop an understanding of why and how analyses are performed, how to interpret results, what the methodological issues are, and how to perform single-subject-level and group-level analyses. Researchers who are familiar with using automated programs to perform advanced analyses will learn what happens when they click the "analyze now" button. The book provides sample data and downloadable Matlab code. Each of the 38 chapters covers one analysis topic, and these topics progress from simple to advanced. Most chapters conclude with exercises that further develop the material covered in the chapter. Many of the methods presented (including convolution, the Fourier transform, and Euler's formula) are fundamental and form the groundwork for other advanced data analysis methods. Readers who master the methods in the book will be well prepared to learn other approaches.

No other Hollywood star has been so closely linked with cars and bikes, from the 1968 Ford Mustang GT Fastback he drove in Bullitt (in the greatest car chase of all time) to the Triumph motorcycle of The Great Escape. McQueen's Machines gives readers a close-up look at the cars and motorcycles McQueen drove in movies, those he owned, and others he raced. With a foreword by Steve's son, Chad McQueen, and a wealth of details about of the star's racing career, stunt work, and car and motorcycle collecting, McQueen's Machines draws a fascinating picture of one outsized man's driving passion. Now in paperback. *The Beginning* Routledge

This successful text puts personality back into the personality course, integrating the classic insights of the personality theorists with modern research in a manner that will fascinate and captive students. Organized around eight basic aspects of personality-psychoanalytic, ego, biological, behaviorist, cognitive, trait, humanistic, and situational/interactionist-the text both explains the classic theories and also explores how the information applies to the student reader. The text presents a balanced, critical, yet optimistic approach. Personality encourages critical thinking about human nature. While holding the highest scientific standards, the text uses unique and provocative pedagogical devices (see below) to capture students' interest and bring the field of personality to life. It has been hailed as the best-written and most relevant personality textbook in the field.

Raised with limited peer interaction, Ernestine St Bennett has difficulty interpreting social cues. At twenty-five she's become a loner; a shy nerd immersed in her scientific studies, whose best friend is her pet fish, Waldo.Then Ernestine meets Simon Prime, who's obviously a nerd, too! Sympathizing with his social dysfunction, Ernie decides to help poor Simon increase his self-esteem and thus enhance his social standing. Using principles learned in her fish studies, she'll simply turn Simon from meek to macho.What Ernestine doesn't know (but Waldo suspects) is that Simon Prime is really ex-cop, private investigator Sam Pierce in disguise. A man who definitely doesn't need his masculinity enhanced!

“A thoughtful and skillful author.” —Cleveland Plain Dealer One of the most respected writers in the field of speculative fiction, Lois McMaster Bujold has won numerous accolades and awards, including the Nebula and Locus Awards as well as the fantasy and science fiction genre’s most prestigious honor, the Hugo Award for Best Novel, four times (most recently for Paladin of Souls). With *The Sharing Knife*

series, Bujold creates a brand new world fraught with peril, and spins an extraordinary romance between a young farm girl and the brave sorcerer-soldier entrusted with the defense of the land against a plague of vicious malevolent beings. In *Passage*, volume three in Bujold’s breathtaking saga of love, loyalty, and courage in the face of bigotry and dark magic, the devoted wedded lovers Fawn Bluefield and Dag Redwing Hickory are joined by new companions in their quest to find peace, acceptance, and a place in a most dangerous world.
