The International Textbook of Diabetes Mellitus has been a successful, well-respected medical textbook for almost 20 years, over 3 editions. Encyclopaedic and international in scope, the textbook covers all aspects of diabetes ensuring a truly multidisciplinary and global approach. Sections covered include epidemiology, diagnosis, pathogenesis, management and complications of diabetes and public health issues worldwide. It incorporates a vast amount of new data regarding the scientific understanding and clinical management of this disease, with each new edition always reflecting the substantial advances in the field. Whereas other

diabetes textbooks are primarily clinical with less focus on the basic science behind diabetes, ITDM's primary philosophy has always been to comprehensively cover the basic science of metabolism, linking this closely to the pathophysiology and clinical aspects of the disease. Edited by four world-famous diabetes specialists, the book is divided into 13 sections, each section edited by a section editor of major international prominence. As well as covering all aspects of diabetes, from epidemiology and pathophysiology to the management of the condition and the complications that arise, this fourth edition also includes two new sections on NAFLD, NASH and non-traditional associations with diabetes, and clinical trial

evidence in diabetes. This fourth edition of an internationally recognised textbook will once again provide all those involved in diabetes research and development, as well as diabetes specialists with the most comprehensive scientific reference book on diabetes available.

REVIEW: . . . Students of educational theory and practice will enjoy-and learn from-this brief but enlightening and readable book. Recommended for upper-division undergraduates, graduate students, faculty, and practitioners. . . - September 98 CHOICE The four teachers in

this study teach diverse subjects in a variety of settings. Although definitions of moral education are shaped by their backgrounds, their institutions, their perceptions of their students' needs, and their disciplines, all of the teachers consider moral education to be central to their work. For all four, the moral prototype serves as an appeal to the students' imagination, an opportunity to build connectedness and, most important, an invitation to young people to transcend themselves.

New strategies for feedback that supports a culture of learning The skill set required for observing why students are learning and how teachers influence that is a difficult one to master—yet it's essential when it comes to driving change and growth in your school. This companion to Feedback to Feed Forward provides a curated collection

of strategies to improve your ability to identify desired outcomes, recognize learning in action, collect relevant and accurate evidence, and develop smart, supportive, and effective feedback about a teacher's impact on learners. And it's not just leaders, coaches, and administrators who can use this highly accessible how-to. This time around, Tepper and Flynn also address the needs of teachers who double as observers, whether they're mentoring new teachers, supporting each other or analyzing the effectiveness of their own teaching. No matter your role, you'll benefit from their expert guidance, as well as:

- Authentic classroom examples
- Observer think-alouds
- Stories from the field with "Give-It-a-Try" tools and

"Stop and Think" questions · Follow-up steps specific to your role

When classroom observation and feedback are both learner-centered (focused on students) and learning-focused (focused on teachers as learners), they lead to a culture of learning throughout the school. Take this book as your guide, and explore just how effective your feedback can be.

Learner-Focused Feedback has been recognized for focusing on practices that have high effect sizes and will help you translate the groundbreaking Visible Learning research into practice. When educators use strategies that have high effects (greater than 0.40), they can accelerate student achievement. The power of the Visible Learning research lies in helping educators understand which

factors have the highest impact on student achievement so that educators can begin making strategic decisions based on evidence that will utilize their time, energy, and resources to the best extent possible. The Visible Learning research is based on Professor John Hattie's unmatched meta-analysis of more than 1,600 research reviews comprising 95,000 studies, involving more than 300 million students—the world's largest evidence base on what works best in schools to improve student learning. From that research, Dr. Hattie identified more than 250 factors that have an impact on student achievement. View a full list of
