Impending technological advances will widen an adversary's attack plane over the next decade. Visualizing what the future will hold, and what new threat vectors could emerge, is a task that traditional planning mechanisms struggle to accomplish given the wide range of potential issues. Understanding and preparing for the future operating environment is the basis of an analytical method known as Threatcasting. It is a method that gives researchers a structured way to envision and plan for risks ten years in the future. Threatcasting uses input from social science, technical research, cultural history, economics, trends, expert interviews, and even a little science fiction to recognize future threats and design potential futures. During this human-centric process, participants brainstorm what actions can be taken to identify, track, disrupt, mitigate, and recover from the possible threats. Specifically, groups explore how to transform the future they desire into reality while avoiding an undesired future. The Threatcasting method also exposes what events could happen that indicate the progression toward an increasingly possible threat landscape. This book begins with an overview of the Threatcasting method with examples and case studies to enhance the academic foundation. Along with end-of-chapter exercises to enhance the reader's understanding of the concepts, there is also a full project where the reader can conduct a mock Threatcasting on the topic of "the next biological public health crisis." The second half of the book is designed as a practitioner's handbook. It has three separate chapters (based on the general size of the Threatcasting group) that walk the reader through how to apply the knowledge from Part I to conduct an actual Threatcasting activity. This book will be useful for a wide audience (from student to practitioner) and will hopefully promote new dialogues across communities and novel developments in the area.

Designed to create tangible materials which support the demands of this context, the INCLUDEED Erasmus+ project aims to integrate migrants and refugees through one of Europe's greatest assets - their languages. This guide aims to become an ally of both those who wish to deepen their knowledge of the migration phenomenon and those who wish to facilitate the integration process of these groups. Developed from the experience that the Universities of the consortium have in this field (University of Salamanca, University of Bologna, University of Coimbra, University of Heidelberg, University of Poitiers and Trinity College Dublin), this document emanates from a common effort as well as from the will to form an egalitarian society in terms of integration. However, this would not have been possible without the support of various non-governmental organisations (Red Cross, ACCEM, CEPAIM Foundation and Sierra-Pambley Foundation) which, dedicated to the reception and integration of migrants and refugees throughout Europe, have facilitated the identification of difficulties and enabled bridges to be built between different perspectives and joint efforts to converge in the same direction. This guide addresses the various challenges that emerge during the integration period of these groups

and proposes solutions that can help this complex process to be successful. Designed as a useful vade mecum for the performance of the tasks of the various groups (language teaching professionals or volunteers, non-governmental organisations and national and supranational public institutions), it is a support tool that guides the actions of those involved in the process of linguistic integration of newly arrived people. It provides them with a better understanding of the situation in which these groups find themselves and of the tools available to achieve this. In short, it is a document that seeks to bring together, through informative but rigorous text, the theoretical advances in this field and to offer various resources that can be put into practice in real life. Finally, we would like to emphasise that the contents of this guide should be understood as suggestions arising from the experience and commitment of those who have worked on its development and as a tool that will help to answer some of the questions that arise in the process of integration of migrant groups. These questions are currently being answered thanks to the committed engagement of all those who are participating in this project. In addition, information from all the countries in the consortium can be found throughout these pages, which broadens the perspective of most of the tools created so far, making this guide truly an international reference work.
