*Miller Levine Biology Reading and Study Workbook a 2008c*  
Prentice Hall

Schizophrenics in the United States currently fare worse than patients in the world's poorest countries. In *Mad in America*, medical journalist Robert Whitaker argues that modern treatments for the severely mentally ill are just old medicine in new bottles, and that we as a society are deeply deluded about their efficacy. The widespread use of lobotomies in the 1920s and 1930s gave way in the 1950s to electroshock and a wave of new drugs. In what is perhaps Whitaker's most damning

revelation, *Mad in America* examines how drug companies in the 1980s and 1990s skewed their studies to prove that new antipsychotic drugs were more effective than the old, while keeping patients in the dark about dangerous side effects. A haunting, deeply compassionate book—now revised with a new introduction—*Mad in America* raises important questions about our obligations to the mad, the meaning of “insanity,” and what we value most about the human mind. **Bad Science, Bad Medicine, and the Enduring Mistreatment of the Mentally Ill** Holt McDougal A totalitarian regime has ordered all books to be destroyed, but one of the book burners, Guy Montag, suddenly realizes their merit. Biology Simon and Schuster Prentice Hall Biology utilizes a student-friendly approach that provides a powerful framework

Prentice Hall AP® teachers know the roots of AP® success are established in the earlier grades. That is the idea behind *Foundations of Language & Literature*, a complete program for 9th Grade Pre-AP® that establishes foundational skills, while challenging bright young minds. The book is driven by the expertise of Renée Shea, John Golden, and Tracy Scholz who know that skills like reading, writing, and working with sources need

---

careful development and constant reinforcement. This genre and mode-based book approaches the course in new ways, investigating nonfiction as well as literature, delving into fascinating argument-driven thematic units, and asking students to write in the genres, to empower them to read like a writer. Innovative, challenging, and nurturing, Foundations of Language & Literature has all the support young minds need to be prepared for AP® success. With the publication of Foundations of Language and Literature, BFW now offers a unified program of Pre-AP® and AP® English textbooks from grades 9 through 12, that guides students from introduction to mastery with a consistent tone and treatment of key AP® topics.

*Biology Savvas Learning Company*  
World History: Patterns of Interaction © 2012 is a highly

integrated, high school world history textbook program with enhanced HISTORY® curriculum that provides teachers with a practical and motivational approach to help students think critically and reflectively. Together, HMH & HISTORY® infuse social studies with streaming video and interactive features that bring content to life for students and help them make connections between the past and present. Meeting the needs of all learners is no easy task. This is why Houghton Mifflin Harcourt created World History: Patterns of Interaction. Designed to engage students with the narrative while integrating rich multimedia assets, the program brings content to life for students and enriches their understanding. - Publisher.

Concepts of Biology is

---

designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday

applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

**Prentice Hall Biology**  
Pearson Prentice Hall

The SOLARO Study Guide is designed to help students achieve success in school. It is a complete guide to be used by students throughout the school year for reviewing and understanding course content, and for preparing for assessments. The content in Texas High School Biology is specifically aligned to the Texas state standards for those who intend to have students complete biology by the end of high school. Each Class Focus includes the following sections:

Structure and Function of

Living Things; Genetics; Evolution and Classification; Biological Macromolecules and Metabolism; Biological Systems; and Ecosystems.

To create this book, teachers, curriculum specialists, and assessment experts have worked closely to develop the instructional pieces that explain each of the key concepts for the course. The practice questions and sample tests have detailed solutions that show problem-solving methods, highlight concepts that are likely to be tested, and point out potential sources of errors. Enhanced treatment of concepts, more practice sections, and additional learning tools are found in the accompanying online version of SOLARO which may be accessed through the web or on mobile devices.
