Miller Radiator 1a Cooling System | eBay
I have an '80s era Miller Radiator 1. It has a 1-1/2 gallon capacity. I use 1 quart ethylene glycol to 1 gallon of deionized water. I get the DI water at the supermarket. This is a little less strength than Miller recommends. Their manual says: "Acceptable coolants include a mixture of 25% pure

ethylene glycol and 75%
distilled or deionized water."
