Adapted Physical Activity Across the Life Span features the following: Interviews with professionals that provide students with real-life stories from educators, health care professionals, and others who work with people with disabilities Chapter objectives, chapter summaries, tables, and charts that emphasize key concepts An interdisciplinary approach and life span approach to show students the broad scope of careers across education, clinical, and community settings Content on adapted physical education for children and young people to educate students in the full implementation of IDEA and physical education for children with disabilities, including assessments, IEPs, and program modifications Content on adapted physical activity for adults to enable students to understand the roles of various professions that facilitate adapted physical activity for adults—from those who recently finished high school to senior citizens—using the Healthy People guidelines, research, and the most contemporary model of aging Information about adapted physical activity for early childhood, with a focus on professions that help a young child with a disability begin their journey of adapted physical education Instructor ancillaries to make it easier for instructors to prepare for and teach the course The interdisciplinary approach provides instructors greater flexibility for courses that include students not only from adapted physical education but also from allied health professions: occupational therapy, physical therapy, speech and language pathology, nursing, medicine, sport psychology, exercise physiology, therapeutic recreation, and more. “ Today, the interdisciplinary nature of service in adapted physical activity begins in the earliest ages and continues with professionals who instruct and nurture the physical activity of the oldest of our communities, ” says coauthor Carol Leitschuh. “ This is the life span approach. ” Coauthor Marquell Johnson adds, “ The interdisciplinary approach and life span approach provide a much wider view of helping people with disabilities achieve optimal health. Most texts focus on a narrower perspective, such as in school, in a medical or community setting, or with a certain age group. However, this book looks at all the professions that are involved in a person ’ s life throughout the life span and offers a coordinated approach. ” Adapted Physical Activity Across the Life Span will help prepare future professionals to serve individuals who require adaptations to be able to enjoy full and healthy active lives over their lifetimes. From infants to the elderly, all across the life span, people can be physically active—and this text will help them be just that.

Criminalizing women has become all too frequent in these neo-liberal times. Meanwhile, poverty, racism, and misogyny continue to frame criminalized women’s lives. Criminalizing Women introduces readers to the key issues addressed by feminists engaged in criminology research over the past four decades. Chapters explore how narratives that construct women as errant females, prostitutes, street gang associates and symbols of moral corruption mask the connections between women’s restricted choices and the conditions of their lives. The book shows how women have been surveilled, disciplined, managed, corrected, and punished, and it considers the feminist strategies that have been used to address the impact of imprisonment and to draw attention to the systemic abuses against poor and racialized women. In addition to updating material in the introductions and substantive chapters, this second edition includes new contributions that consider the media representations of missing and murdered women in Vancouver’s Downtown Eastside, the gendered impact of video surveillance technologies (CCTV), the role of therapeutic interventions in the death of Ashley Smith, the progressive potential of the Inside/Out Prison Exchange Program, and the use of music and video as decolonizing strategies.

As part of our mission to enhance learning and ensure access to information for all library patrons, our profession needs to come to terms with the consequences of mass incarceration, which have saturated the everyday lives of people in the United States and heavily impacts Black, Indigenous, and people of color; LGBTQ people; and people who are in poverty. Jeanie Austin, a librarian with San Francisco Public Library’s Jail and Reentry Services program, helms this important contribution to the discourse, providing tools applicable in a variety of settings. This text covers practical information about services in public and academic libraries, and libraries in juvenile detention centers, jails, and prisons, while contextualizing these services for LIS classrooms and interdisciplinary scholars. It powerfully advocates for rethinking the intersections between librarianship and carceral systems, pointing the way towards different possibilities. This clear-eyed text begins with an overview of the convergence of library and information science and carceral systems within the United States, summarizing histories of information access and control such as book banning, and the ongoing work of incarcerated people and community members to gain more access to materials; examines the range of carceral institutions and their forms, including juvenile detention, jails, immigration detention centers, adult prisons, and forms of electronic monitoring; draws from research into the information practices of incarcerated people as well as individual accounts to examine the importance of information access while incarcerated; shares valuable case studies of various library systems that are currently providing both direct and indirect services, including programming, book clubs, library spaces, roving book carts, and remote reference; provides guidance on collection development tools and processes; discusses methods for providing reentry support through library materials and programming, from customized signage and displays to raising public awareness of the realities of policing and incarceration; gives advice on supporting community groups and providing outreach to transitional housing; includes tips for building organizational support and getting started, with advice on approaching library management, creating procedures for challenges, ensuring patron privacy, and how to approach partners who are involved with overseeing the functioning of the carceral facility; and concludes with a set of next steps, recommended reading, and points of reflection.

Dark Psychology SCM Press

You just hit the jackpot! This is a book combo of 8 in 1, where you'll find all the hidden secrets that lie in discussed subtopics about the human mind. Here is a brief overview: Book 1 (Hypnosis): When we speak of NLP (or: Neuro Linguistic Programming), we talk about certain rituals and mindsets the brain should compose. When taken into consideration, even hypnosis can tremendously add to a person's will to break free from addiction, take matters into his/her

own hands, or make the necessary life changes they have been postponing for a long period of time. We will explore these two great topics, and touch on various other related topics as well. Get ready to experience the ethical and mystical power of hypnosis and the far depths of the human brain that reacts to it. Book 2 (Self-Hypnosis): With hypnosis being such a mysterious phenomenon, what about self-hypnosis? You'll read more about these strange ways of controlling the mind, and all the techniques, myths, and lies that go with it. Truths versus Hollywood images are displayed and exposed. And you'll get a fuller, deeper understanding of what hypnosis is and how you can apply it to yourself. Learn to increase your abilities, exert control and apply the relaxing, clearing methods of hypnosis and self-hypnosis now. Book 3 (How to Become an Alpha Male): So many men miss the point! They show off, they do everything they can to get results so that good-looking women approve of what they do, and they still don't get the attention they seek. What are they doing wrong? I was like this too. I never understood how a guy could show up and immediately have all kinds of women surrounding him. After all, I was nice, respectful, and sincerely interested in women. What did that guy have that I didn't? Well, in this guide, you'll see it the right way. You'll understand the God-give or evolutionary (whatever you believe) traits that primates have with which they can have what and who they want and dominate the pack. Book 4 (Dark Psychology): You may be wondering why it would be okay to use something called "dark psychology," and if it's not completely evil. Well, in this book, you'll learn that there is much more to it than that. You will see what people are doing each day, consciously and subconsciously, and how to recognize it faster. Book 5 (Influence): Even if we don't know it or do it on purposes, we are always influencing others. We influence people by the way we dress, look, talk, or behave ourselves on the internet. In this book, you will find out what it takes to increase the influence you have on others, and to really know what you're doing. Many people don't. They just go through the day without wondering what effect their words and actions have on others. But you won't make that same mistake. Learn the secrets inside. Book 6 (Mentalism): Many people wonder what mentalism is. Actually, it's a lot like magic. You make people believe that you have divine or superhuman abilities by using deception techniques to create a show, persuade, or sell. There are different kinds of mentalism, each with its pros and cons. In this guide, you'll learn about the best practices and most common ways to use this skill. Book 7 (Persuasion): What is persuasion and how can you apply it? This and many other questions will be answered in this brief guide to learning the basics of persuasion techniques. You will be amazed at the new information and knowledge you'll receive. Book 8 (Persuasion): We are all driven by emotions, desires, and impulses that enter our brains. Methods of persuasion have been used throughout history, some with success and some without. In this book, you'll find new insights of how the psychology of persuading others to do what you want works.

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she’s showing us how to put those ideas into practice so we can step up and lead. Don’t miss the five-part HBO Max docuseries Brené Brown: Atlas of the Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don’t pretend to have the right answers; we stay curious and ask the right questions. We don’t see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don’t avoid difficult conversations and situations; we lean into vulnerability when it’s necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we’re choosing not to invest in developing the hearts and minds of leaders at the exact same time as we’re scrambling to figure out what we have to offer that machines and AI can’t do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, “One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It’s learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It’s why we’re here.” Whether you’ve read Daring Greatly and Rising Strong or you’re new to Brené Brown’s work, this book is for anyone who wants to step up and into brave leadership.

The guideposts not only help us understand the practices that will allow us to change our lives and families, they also walk us through the unattainable and sabotaging expectations that get in the way. Brené writes, “This book is an invitation to join a wholehearted revolution. The image of the architect is undeniably gendered. While the male architect might be celebrated as the ideal man in Hollywood romantic comedies, blessed with practicality and creativity in equal measure to impeccable taste and an enviable lifestyle, the image of the woman architect is not so clear cut. While women have been practicing and excelling in architecture for more than a hundred years, their professional identity, as constructed in the media, is complex and sometimes contradictory. This book explores the working lives and aspirations of women in architectural practice, but more than this it explores how popular media – newspapers, magazines, and websites – serve to define and describe who a woman architect should be, what she should look like and how she should behave. Looking further, into the way that professional characteristics are reinforced through awards like the Pritzker Prize, the book demonstrates how idealised characteristics such as sensitivity and vision are seen to be neither entirely masculine nor feminine, but instead a complex hybrid owing much to historic concepts of genius. Drawing on history, sociology, media analysis and feminist theories of architectural practice, the book will be of interest to all of those who seek to better understand the image and identity of the architect. This book was published as a double special issue of Architectural Theory Review.
