"Godfire is a phenomenal book. Vivid worldbuilding, believable characters, and sinister magic combine to create a story worthy of the ages." -Nancy Fulda, author of *Dead Men Don't Cry* The gods are gone, long ago trapped in stones and lost to the ages. A godless nation rises to power, fueled by a brilliant and genocidal dictator who is willing to manipulate souls and embrace dark magics to spread his empire over the whole of the Five Lands. Kenton is the last of his people, desperately searching for others who can aid in his quest to unearth the gods from their hiding places and restore goodness and order to the world. As Kenton gathers together the legendary godbearers--who are said to be able to retrieve the gods, wherever they lie--he finds an unlikely ally in Daniella, the daughter of the dictator himself. Daniella is tired of being her father's puppet, all too eager to be out of his grasp. But as they travel together, Kenton begins to suspect she may be something far more dangerous than a dictator's pawn. Instead, she may be his most deadly weapon. "Cara Witter weaves a tapestry of fascinating magic, forgotten deities, and political and military conflict, all while

deftly balancing a huge cast of awesome characters. A spectacular first entry in a series that will surely live up to the term 'epic.'" -Christopher Husberg, author of the *Chaos Queen Quintet* "Awe and immersion that only the best epic fantasy can inspire." -Gregory D. Little, author of the *Unwilling Souls* series "A well-rounded cast of characters that will leave you hungry for the sequel." -Dantzel Cherry, author of *"In All Possible Futures"* and *"Birthing Fire"* Cara Witter is the pseudonym of Janci Patterson, Megan Walker, and Lauren Janes. Janci and Megan have also collaborated on a romantic comedy series (*THE EXTRA*) and a young adult paranormal fantasy series (*SINKING CITY*). Janci has also co-written books in Brandon Sanderson's *SKYWARD* series (*SUNREACH*, *REDAWN*, and *EVERSHORE*).

*Illegal Alphabets and Adult Biliteracy*--based on four years of intensive fieldwork in a small rural community in Southern Illinois--is a landmark work in the area of adult literacy, combining insights from linguistics, anthropology, literacy studies, and education in a culturally situated exploration of the language and literacy practices of migrant workers. As such, it is a substantive contribution to the linguistic study of indigenous literacies; to sociocultural approaches to language, learning, and literacy; and to ethnographic and critical approaches to education. The book begins with a true story about "illegal aliens" who, in the summer of 1980, in the town of Cobden, Illinois, decided to help each

other write down English como de veras se oye--the way it really sounds. The focus is on why and how they did this, what they actually wrote down, and what happened to their texts. The narrative then shifts to how and why the strategies adult immigrants actually use in order to cope with English in the real world seem to have little in common with those used by students in publicly funded bilingual and ESL classrooms. The book concludes with a discussion of the ideal of a universal alphabet, about the utopian claim that anyone can use a canonical set of 26 letters to reduce to script any language, ever spoken by anyone, anywhere, at any time. This claim is so familiar that it is easy to overlook how much undocumented intellectual labor was invested over the centuries by those who successfully carried the alphabet across the border from one language to the next. From this undocumented labor, without which none of us would now be able to read, everyone profits. To make his story and his argument as accessible as possible, Kalmar steers clear of jargon and excessive technical terminology. At the same time, however, readers who are familiar with any of the current postmodern discourses on the social construction of symbolic forms will be able to bring such discourses to bear on what he has to say about the game, the discourse, and the scene of writing that constitute the focus of his theoretical analysis. When people today argue about "illegal aliens" in the United States, probably the last question on their minds is the one to which this book is devoted: how do "illegal aliens" use an alphabet they already know in order to chart the speech sounds of colloquial English? It is the author's hope that readers will

interpret his story as a parable with serious political implications. *Illegal Alphabets and Adult Biliteracy* is a compelling, vitally relevant book for researchers, students, practitioners, and anyone else interested in language and literacy in social, cultural, and political contexts, including bilingual and ESL education, second-language acquisition and development, applied and sociolinguistics, multicultural education, educational anthropology, and qualitative research. *Getting MAD: Nuclear Mutual Assured Destruction, Its Origins and Practice Spectra*

Welcome to Kapri James-White's world. Walk the streets of Detroit with her and learn what it truly means to be Married to the Shooter! Kapri James wasn't born into the struggle of the game, but she craves it. Despite pleas from her mother, the upper-middle-class teen is addicted to "slumming" and living the fast life. Everything about the black-hearted mentality of Detroit draws her in with ease. From New York Times bestselling author James Rollins and award-winning suspense novelist Rebecca Cantrell comes a disturbing story of vengeance, bloodshed, and creatures that prowl the night. In the haunted, war-torn highlands of Afghanistan, amid the ruins of Shahr-e-Gholghol, an archaeology team is massacred in the night. Sergeant Jordan Stone and his crack forensic team are called in to examine the site, to hunt for the perpetrators of this horrific act. But the discovery of a survivor—a child of ten—will shatter all the team knows about life and death. Among the crumbling bones of dead kings, something hoary and murderous stirs out of the ancient past, lurching forward to claim vengeance on those still living. Included with this thrilling story is a sneak peek at *The Blood Gospel*, where the further exploits of Sergeant Stone and his team will be revealed.

A motivation and learning strategies textbook that bridges research and practice! *Motivation and Learning Strategies for College Success, Second Edition* teaches college students how to become more self-directed learners. Study skills are treated as a serious academic course. Students learn about human motivation and learning as they improve their study skills. The text does not offer "recipes" for success or lists of "quick tips." Rather, the focus is on relevant information and features designed to help students to identify the components of academic learning that contribute to high achievement, to master and practice effective learning and study strategies, and then to complete self-management studies whereby they are taught a process for improving their academic behavior. A framework organized around six components related to academic success (motivation, methods of learning, time management, control of the physical and social environment, and performance) makes it easy for students to understand what they need to do to become more successful in the classroom. The text combines an overview of theory and research, to help learners understand what factors determine or influence successful learning and why they are asked to use different study and learning strategies in the text, with field-tested exercises, follow-up activities, and appendices that assist students in observing and changing their own behavior. A separate Instructor's Manual provides helpful information for teaching the material; includes additional exercises and experiences for students; provides both objective and essay test questions; and includes information on how students can maintain a portfolio to demonstrate their acquisition of learning and study skills and guidelines for helping students complete a self-management study of their own behavior.

The diminishment of Arctic sea ice has led to increased human activities in the Arctic, and has heightened interest in, and concerns about, the region's future. The United

States, by virtue of Alaska, is an Arctic country and has substantial interests in the region. On January 21, 2015, President Obama issued an executive order for enhancing coordination of national efforts in the Arctic. The United States assumed the chairmanship of the Arctic Council on April 24, 2015, and will serve in that capacity for two years. Record low extents of Arctic sea ice over the past decade have focused scientific and policy attention on links to global climate change and projected ice-free seasons in the Arctic within decades. These changes have potential consequences for weather in the United States, access to mineral and biological resources in the Arctic, the economies and cultures of peoples in the region, and national security. The five Arctic coastal states—the United States, Canada, Russia, Norway, and Denmark (of which Greenland is a territory)—have made or are in the process of preparing submissions to the Commission on the Limits of the Continental Shelf regarding the outer limits of their extended continental shelves. The Russian submission includes the underwater Lomonosov Ridge, a feature that spans a considerable distance across the Arctic Ocean. The diminishment of Arctic ice could lead in coming years to increased commercial shipping on two trans-Arctic sea routes—the Northern Sea Route and the Northwest Passage. Current international guidelines for ships operating in Arctic waters are being updated. Changes to the Arctic brought about by warming temperatures will likely allow more exploration for oil, gas, and minerals. Warming that causes permafrost to melt could pose challenges to onshore exploration activities. Increased oil and gas exploration and tourism (cruise ships) in the Arctic increase the risk of pollution in the region. Cleaning up oil spills in ice-covered waters will be more difficult than in other areas, primarily because effective strategies have yet to be developed. Large commercial fisheries exist in the Arctic. The United States is currently meeting with other countries regarding the management of Arctic fish stocks. Changes in the Arctic could affect threatened and endangered species. Under the Endangered Species Act, the polar bear was listed as threatened on May 15, 2008. Arctic climate change is also expected to affect the economies, health, and cultures of Arctic indigenous

peoples. Two of the Coast Guard's three polar icebreakers—Polar Star and Polar Sea—have exceeded their intended 30-year service lives, and Polar Sea is not operational. On May 12, 2011, representatives from the member states of the Arctic Council signed an agreement on cooperation on search and rescue in the Arctic. Although there is significant international cooperation on Arctic issues, the Arctic is increasingly being viewed by some observers as a potential emerging security issue. Some of the Arctic coastal states, particularly Russia, have announced an intention or taken actions to enhance their military presences in the high north. U.S. military forces, particularly the Navy and Coast Guard, have begun to pay more attention to the region in their planning and operations.

*The Dragon's Fang* Moonstone Chronicles

Set in the challenging terrain of Ice Age Europe that millions of Jean Auel's readers have come to treasure, *The Mammoth Hunters* is an epic novel of love, knowledge, jealousy, and hard choices—a novel certain to garner Jean Auel even greater acclaim as a master storyteller of the dawn of humanity. Ayla, the independent heroine of *The Clan of the Cave Bear* and *The Valley of Horses*, sets out from the valley on Whinney, the horse she tamed. With her is Jondalar, the tall, handsome, yellow-haired man she nursed back to health and came to love. Together they meet the Mamutoi—the Mammoth Hunters—people like Ayla. But to Ayla, who was raised by the Clan of the Cave Bear, they are "the Others." She approaches them with mixed feelings of fear and curiosity. Talut, a powerful bear of a man with bright red hair, a booming laugh, and a gentle heart, and his tall, dark-haired sister, Tulie, are the leaders of the Lion Camp of the Mamutoi. It is here that Ayla finds her first women friends, but some among the Mamutoi dislike Ayla because she was raised by "flatheads," their name for the people of the Clan. Ayla is haunted by her memories of the Clan because Rydag, a child of mixed parentage living with the Mamutoi, bears so strong a resemblance to her own son, Durc. It is the Mamutoi master carver of ivory—dark-skinned Ranec, flirtatious, artistic, magnetic—who fascinates Ayla. She finds herself drawn to him. Because of her uncanny control over animals, her healing skills, and the magic firestone she discovered, Ayla is adopted into the Mammoth Hearth by Mamut, the ancient shaman of the Great Earth Mother. Ayla finds herself torn between her strong feelings for Ranec and her powerful love for the wildly jealous and unsure Jondalar. It is not until after the great mammoth hunt, when Ayla's life is threatened, that a fateful decision is made. This eBook includes the full text of the novel plus the following additional content: • An Earth's Children® series sampler including free chapters from the other books in Jean M. Auel's bestselling series • A Q&A with the author about the Earth's Children® series
