schedule, and budget. Achieve the results you want. Build realistic schedules, and learn how to keep costs under control. Track your progress. Measure your performance, make course corrections, and manage changes. Use Project's power tools. Customize Project's features and views, and transfer info directly between Project and other programs. Popular Photography Clarkson Potter. Renowned engine builder and technical writer David Vizard turns his attention to extracting serious horsepower from

small-block Chevy engines while doing it on a budget. Included are details of the desirable factory part numbers, easy do-it-yourself cylinder head modifications, inexpensive but effective aftermarket parts, the best blocks, rotating assembly (cranks, rods, and pistons), camshaft selection, lubrication, induction, ignition, exhaust systems, and more. Popular Photography Springer Science & Business Media. The emphasis on cancer management in the past was based primarily on

control rates from multidisciplinary input in management. There has always been a recognition that one would like to achieve the best result with the least complication, but never has there been any major emphasis on evidence-based outcome studies, nor on functional preservation and quality of life. The authors of this book have dealt very effectively with the various tumor types in

head and neck cancer with the experts in the field of management. The contents range from epidemiology and treatment outcome, treatment techniques with the potential impact on the quality of life such as dysphagia, to the various options relative to high technology radiation therapy programs for management. The potential for improving form and

function through surgical care as an integrated part of the program is dealt with very effectively as well as the potentials for chemotherapy and the use of targeted agents have on quality of life issues. The volume also addresses toxicity, quality of life, and techniques for prevention of adverse effects, as well as the potentials for rehabilitation and supportive care. The

authors have clearly done an extraordinarily good job in addressing the multiplicity of problems that impact upon the functional preservation and quality of life in head and neck radiation therapy. In this industrial and technological age, energy plays a principal role in sustainable development. This is connected to issues regarding availability, production processes, utilization, and environmental impact. Due to the increased rate of population growth, the energy demand in the entire world is getting to the level that it may not be sustained in the nearest future if drastic

action is not taken to address the situation, especially from research and development perspectives. "None of the millennium development goals (MDGs) can be completed without considerable improvements in the quality and quantity of energy services in developing countries," according to the United Nations Development Programme (UNDP). Based on this fact, UNDP is making efforts, especially in developing countries to ensure that people have access to sustainable sources of clean, reliable, and affordable energy since every aspect of human development is highly impacted by this vital resource.
