Strengthening Forensic Science in the United States

Has any other British car ever equaled the cult status of the Mini, particularly the 'hot' Cooper and Cooper S versions built from 1961 to 1971? Their fanatical following says not. Genuine examples are expensive and highly prized today, but fake Coopers abound and many cars have been inappropriately modified or incorrectly restored. This is the definitive guide to correct factory specifications and equipment for all Coopers from the 997cc MkI to the 1275cc MkIII S, with comprehensive color photography of cars selected for their quality and authenticity.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
