**The Wheels of Friend** Motorbooks  
This book is one mans attempt to make peace with a world that was on the brink of mutually agreed upon destruction. He

chose a bicycle as his medium of expression and named it Friend. His intent was to go from California and head east until going to The Soviet Union. He wanted to meet Soviets and show others that they were alright. He made it as far as East Germany but was not allowed travel any farther east. From there the traveling cyclist heades for the Mediterranean and the Middle East. And then onward around the world. He ran out of money after one year of traveling. He traveled across large continents like Australi and China and circumvented the Philippines, Taiwan, South Korea and Japan. In all he comes away with a world experience and a new way of looking at the planet.

Mini Cooper Icon Books

The Mini, the car of the 20th Century and still in motorsport in 1997, 35 years after its 1st event. This is its story. In the 60s the BMC works teams using Mini s were virtually unstoppable in their quest for recognition in the big world of rallying, they succeeded where others had failed and the BMC works teams were at the time probably the envy of the motorsport world. They introduced to the enthusiast the Special Tuning or ST as it was later known, a range of tuning products that the public could buy and fit to their own cars thus using the very same parts that the works team were using. Sadly the competition department was wound down and the ST finally went the same way in 1980. Imagine the excitement that hit the media when in the Autumn of 1993 Rover officially announced that they would fund the build of several cars to once again campaign the world famous Rallye Monte Carlo. Although they were not works cars, the large contribution of materials and money to the project it was regarded as tantamount to funding a works team, especially when Paddy Hopkirk was named as one of the drivers. It was this that started 4 years of Works backed mini s to varying degrees, culminating in 1996 to a full works backed team of 2 cars and a full campaign of rallies and races for the three years. Typically the Mini of the 90 s, similarly to the Mini of the 60 s, carried with it a fair degree of controversy. Over the next four years there was plenty of it, with money being diverted by the sponsor from one team to another, one car even being stolen and top rallying stars carrying out secret test sessions, being just a few examples. All of this using cars that were designed way back in the 50 s and even still using the same basic design of engine and gearbox against competitors who were using cars

designed over thirty years later with modern engines and transmissions. This book highlights how the use of fuel injection, distributor-less ignition, six speed gearboxes and modern tyres all helped to bring the mighty mini once again to the foreground of modern rallying and racing. In 1996 the ST range of competition parts was re-introduced, with the parts coming from the latest 1996 build of works cars but once again in mid 1997 the project was pulled amid secrecy, sackings and bitter recriminations that even to this day have prevented the authors from being able to speak to those that were involved behind the scenes at the end of the line for the Last Works Minis . With many unseen photos of the cars development, copies of Rovers internal documents, copy pages from the road books of top rallies, all of this in colour this book truly brings this previously untold story to life.

Born in Shropshire soon after the end of the First World War, venerable motoring writer W de Forte has driven everything from his grandfather's first Daimler, to modern-day supercars ... ridden everything from vertiginous Victorian penny farthings, to high velocity twenty-first century superbikes ... travelled everywhere from the permafrost of the Arctic Circle to the baking sands of the Baja Peninsula ... and met everyone from Tazio Nuvolari to Valentino Rossi. W de Forte enjoyed an eventful career as a top-level journalist, spanning 75 years, during which time he tested many thousands of cars and reported on countless automotive events around the world. This made him uniquely qualified to comment on all aspects of classic and vintage motoring and motorcycling. Relatively undimmed by age and age, even in his 90s, de Forte had no plans to retire, but, in early 2011, a high-speed prang while testing a wayward Rudge Ulster at a racing circuit in Belgium brought him up with a jolt, both literally and metaphorically. After recuperating in hospital, he settled down to write his long-awaited and much requested autobiography. This unique and insightful book is the result. Packed with fascinating

stories about classic cars and motorcycles, A Life Awheel – the 'Auto' Biography of W de Forte is an account of an extraordinary motoring life, and the story of motoring in the 20th century.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest

head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago. You can save \$2,000 by cutting freight fees and "administrative" charges. Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea.

So formidable an opponent did the Iraqi airforce consider the F-14 that during the Iran-Iraq war, they ordered their pilots not to engage F-14s and the presence of one in an area was usually enough to empty it of Iraqi aircraft. Officially losses were tiny; only one F-14 was lost in aerial combat (to a MiG-21), one to a control problem and one downed by a ground-to-air missile. This book looks at the F-14's Iranian combat history and includes first hand accounts from the pilots themselves. It will consider key engagements and the central figures involved, illustrating the

realities, successes and failures of the Iranian air campaign.
