Original Mini Cooper David and Charles
The fascinating,

funny, sometimes controversial autobiography of Stuart Turner, one of the leading motorsport figures of the past 50 years. In this book, one of motorsport's most engaging and enthusiastic

characters writes frankly, revealingly and above all modestly about guiding BMC and Ford to rally glory. **Ferrari Fever** Totem Books
This is a non-fiction love story with a tragic end,

played out in the 1960s and 70s in Worcestershire, on the Hampshire-Surrey border, in the old county of Huntingdonshire and in Wiltshire. On the way, the author sheds light on the Worcester of their courtship in the early 1960s with its pubs, coffee bars, new innovative Chinese and Indian restaurants, funfairs, a jazz club, concerts at the Gaumont Cinema and the Victor Sylvester Dance Studio free sessions on Friday nights, as well as the Cambridge of the mid-1970s its noted resident Syd Barrett. The author is not immune to getting sidetracked into waxing lyrical about his other main interests: music and cars. Carole, with her quirky, childlike personality and lilting West Country banter, could turn any situation into a joyous, enchanting memory, and the author has tried to reflect this in her story. She had her own unique way of dealing with life's challenges, like marriage, cooking, childbirth, motherhood, her husband's "career moves" from one end of the country to the other, driving lessons, learning to swim, DIY, and being a parish councillor. In meeting her final daunting challenge, she showed great fortitude, courage and consideration for others.

helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace. Further Up the Inverted Pyramid Amberley Publishing Limited Mini celebrates 60 amazing years of this iconic car, from its revolutionary introduction to the popularity of its new-generation models. The first two-door Mini, introduced in 1959 and built until 2000, revolutionized automotive design with its

innovative front-wheel-drive layout that made the car appear bigger on the inside than the outside. In 1999, the Mini was voted the second most influential car of the 20th century, behind the Ford Model T. Designed for British Motor Corporation (BMC) by Sir Alec Issigonis and manufactured in England, Australia, Spain, Belgium, Chile, Italy, Portugal, South Africa, Uruguay, Venezuela, and Yugoslavia, the Mini was as successful in competition as it was on the street, winning the Monte Carlo Rally four

times from 1964 through 1967. Originally built by BMC, the Mini's later parent company, Rover, was acquired by BMW in 1994. In 2000, BMW sold most of the Rover Group but retained the Mini brand. The last original Mini rolled off the production line in October 2000. In July 2001, BMW launched production of the new-generation of Mini which was soon joined by Countryman, Clubman, convertible, Cooper Works, and numerous special editions. Nearly 20 years later, the new Minis remain as

popular as the original from 1959. Lemon-Aid New Cars 2001 Amberley Publishing Limited The essential companion to Cooper and Cooper S models from the 997cc MkI to the late 1275cc MkIII, including the Italian Innocentis, the Spanish-built Athis, Australian versions, and the Rover Coopers. Exhaustive research yields a wealth of heretofore unpublished information. About Face The Crowood Press As U.S. and Canadian automakers and

dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol

power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz – rich cars, poor quality. There ' s only one Saturn you should buy. Toyota – enough apologies: "when you mess up, ' fess up." Original Mini Cooper and Cooper S Dundurn The 998 A-Series powers Minis and Metros in particular. Lemon-Aid New Cars and Trucks 2010 Amberley Publishing Limited An all-new book on these two iconic sports cars MINI Cooper Service Manual Haynes Publishing UK Built from 1951 to 2000, BMC ' s A-Series engine was a remarkably successful, versatile and invaluable

power unit that far outlived its original projected life. Not only did it power road cars as varied as the Austin A30, the Mini and the MG Midget, but it also found use in world-class race and rally cars, record-breaking special machines, light commercial vehicles and even tractors. This fascinating illustrated book chronicles the full history and achievements of this remarkable engine, nearly 15 million of which were made.

David and Charles Getting a Rover K-Series engine properly up and running can be a difficult task, but ultimately the result is always worthwhile. Illustrated with over 300 photographs, *Rover K-Series Engine - Maintenance, Repair and Modification* is a practical guide to keeping these unique engines in fine working order. The most well-

known issue with the K-Series is the head gasket, and this book demonstrates how to identify common faults, before giving practical advice on how best to solve them. Step-by-step guidance on all aspects of long-term engine maintenance is provided, in addition to the improvements required to prevent further problems. A K-Series engine is then stripped down to examine its clever and

interesting structure, and is rebuilt with improvements. Authors of over twenty automotive books and countless articles in assorted motoring magazines, Iain Ayre and Rob Hawkins have combined their knowledge to bring you this book on the Rover K-Series engine, which is fully illustrated with 356 colour photographs. Automotive News Crown Ferrari Fever is

a fascinating and nostalgic look back at the classic car collecting scene in the 60's and 70's, an era when some of the rarest and most interesting Italian automobiles could still be found hidden or languishing in barns, junkyards or by the side of the road...almost lost in time. Paul Schouwenburg's story begins in wartime occupied Amsterdam, a poignant backdrop to the hardships of the years to follow, when the appearance of

any exotic Italian thoroughbred was a rare sight indeed. Fuelled by a fascination for all things mechanical, adventures on a Rudge bicycle and early experiences in his parents' succession of Rovers, Paul gains a burning passion for finding, restoring, and ultimately racing Italian cars. But these were not just any Italian cars -from the early 60s onwards, he begins to uncover several rare Alfas, from 1900CSS Zagato to Tipo 33/2, in

addition to a host of very special Ferraris, including a 250GTO, 340 America Touring, 250 MM Vignale Berlinetta, 250GT SWB Competition/61 and 275GTB/C/LM, usually by word of mouth or tenuous rumour. Having acquired them, often many different models at a time, he would drive them home across Europe through snow storms, and restore them single-handedly in his spare time, full-time job as a world-

leading head and neck cancer surgeon permitting! If that wasn't exciting enough, he would then race them, often winning, before moving on to the next irresistible project. Filled with rich anecdotes and rare insights into the colourful characters of the day, including Jacques Swaters and Rob de la Rive Box, Paul's passion and incredible drive make for exciting reading. Indeed this is a unique take, a look in the rear view mirror at a bygone era

when gems could be found incredibly cheaply and enthusiasts took seat-of-the-pants decisions regarding many aspects of a hobby which was uncharted, innocent and simply not as commercial as today he couldn't even give away his 250 GTO at the time!
