The Mom Test is a quick, practical guide that will save you time, money, and heartbreak. They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. You shouldn't ask anyone if your business is a good idea. It's a bad question and everyone will lie to you at least a little . As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right . Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.

A collection of the wildest conspiracies to ever exist, from mind control experiments to lizard people, this book explores, debunks—and sometimes proves—the secret stories that don't quite make it into the history books. What's fact and what's fiction? With conspiracy theories, sometimes it's hard to get to the truth! In *Conspiracies Declassified*, author and expert skeptic Brian Dunning explains fifty true stories of famous conspiracies throughout history. From the moon landing hoax, to chemtrails, to the mind control dangers of fluoride, Dunning is here to sort the truth from the lies to tell you what really happened.

"In the early 1990s, a small group of "AIDS denialists," including a University of California professor named Peter Duesberg, argued against virtually the entire medical establishment's consensus that the human immunodeficiency virus (HIV) was the cause of Acquired Immune Deficiency Syndrome. Science thrives on such counterintuitive challenges, but there was no evidence for Duesberg's beliefs, which turned out to be baseless. Once researchers found HIV, doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission"--

Find out how to increase your marketing success with this book on neuro-advertising. Marketing is one of the most important departments in a company. It is responsible for attracting new customers and retaining existing customers. Unfortunately, in many cases, high budgets are spent on marketing strategies that have little effect. This book on neuro-advertising will help you to effectively increase the impact of your advertising. It is based on the "Subconscious Decision Marketing Index" (SDMI). This neuroscientific method represents a new marketing tool that can be used to measure the subconscious impact of advertising. These include: Facial features Body Reactions Emotions Brain activity In this way, advertising strategies can be effectively planned and marketing efficiency sustainably increased. It is measured how successful advertising is or is not. Then advertising measures can be designed according to the target group. Marketing agencies can benefit from this technique as well as marketers working for companies. Key figures help to compare results Typically, it is difficult to measure unconscious emotions and emotions. However, this new method manages to do just that by creating metrics in the context of consumer research. In this way, individual indices of marketing effectiveness can be measured: Emotional Index: What emotions does advertising trigger? Benefit Index: To what extent does the advertising convince with brain-appropriate benefits? Memory index: How high is the actual memory value? Hormone index: Which hormonal reactions are triggered and how do they influence the buying process of customers? Impulse Index: How well does advertising use impulse opportunities? In turn, you can easily compare these indices with previous measurements and derive clear recommendations for action. The book on neuro-advertising explains this method in a practical way, allowing you to integrate it directly into your marketing planning.
