It's not the size that matters, Austin Powers tells his son as they look over the MINI, "but how you use it." And the diminutive MINI has made it big -- from the beginning. This book tells the full story of the iconic car from its initial launch in the late 1950s through its current super-hip BMW-built incarnation -- right up to the revised version set for release in 2006. Packaged in a clever "under the hood" flap with magnetic clasp (the front flap opens to show the engine), MINI 50 Years captures both the sense of fun and style that have made Mini one of the most popular compacts in the history of the automotive industry. The threads that tie together the original MINI and today's are numerous and fascinating, and as interesting as the differences that set the two cars apart. MINI 50 Years follows them all. From the swingin' star of movies—immortalized in the original film The Italian Job in 1961 and again in the 2003 remake, as well as in The Bourne Identity—to the racing champ and now the 21st-century hipster vehicle of choice, Minis are small, fun, memorable, and cool. Author and mini expert Rob Golding treats readers to every thrill that marks the MINI.

WARNING: This is not the actual book Looking for Alaska by John Green. Do not buy this reading Sidekick if you are looking for a full copy of this great book. Use this expert sidekick to dissect these themes in Looking for Alaska, while enjoying a detailed analysis of each chapter of the book. If that wasn't enough, we close with potential questions and responses to help you get the conversation started with co-workers, friends, or fellow book club members. This newly discovered gem from the past (2005) has become a must-read, thanks in no small part to the success of Green's 2012 masterpiece: The Fault in Our Stars. As many Green fans have already discovered, our sidekick is the ultimate go-to source for

understanding the complexities of John Green's tales of teen angst and tragedy. Looking for Alaska tells the story of Miles Halter, a 16-year-old with a nondescript life who is seeking a "Great Perhaps." In his quest, he finds himself at the Culver Creek Boarding School, where his past life of boredom and safety takes a back seat to adventure and sexual experimentation. His trek to the other side of the tracks takes him only a few steps, as he meets Alaska Young just down the hall at school. She is sexy, funny, and everything else that makes teenage boys drool. She is also a self-destructive sort, headed toward the "After" portion of Looking for Alaska, where everything comes crashing down. As our sidekick details, the themes of life and death weave their way through the novel, drawing the characters closer together while preparing them for something that will rip them apart.

Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
