This manual is the first comprehensive account of Brazilian Portuguese linguistics written in English, offering not only linguists but also historians and social scientists new insights gained from the intensive research carried out over the last decades on the linguistic reality of this vast territory. In the 20 overview chapters, internationally renowned experts give detailed yet concise information on a wide range of language-internal as well as external synchronic and diachronic topics. Most of this information is the fruit of large-scale language documentation and description projects, such as the project on the linguistic norm of educated speakers (NURC), the project "Grammar of spoken Portuguese", and the project "Towards a History of Brazilian Portuguese" (PHPB), among others. Further chapters of high contemporary interest and relevance include the study of linguistic policies and psycholinguistics. The manual offers theoretical insights of general interest, not least since many chapters present the linguistic data in the light of a combination of formal, functional, generative and sociolinguistic approaches. This rather unique feature of the volume is achieved by the double authorship of some of the relevant chapters, thus bringing together and synthesizing different perspectives.

"This book presents a structured yet flexible methodology for developing intercultural competence in a variety of contexts, both formal and informal. Piloted around the world by UNESCO, this methodology has proven to be effective in a range of different contexts and focused on a variety of different issues. It therefore can be considered an important resource for anyone concerned with effectively managing the growing cultural diversity within our societies to ensure inclusive and sustainable development. Intercultural competence refers to the skills, attitudes and behaviours needed to improve interactions across difference, whether within a society (differences due to age, gender, religion, socio-economic status, political affiliation, ethnicity, and so on) or across borders. The book serves as a tool to develop those competences, presenting an innovative adaptation of what could be considered an ancient tradition of storytelling found in many cultures. Through engaging in the methodology, participants develop key elements of intercultural competence including greater self-awareness, openness, respect, reflexivity, empathy, increased awareness of others, and in the end, greater cultural humility. This book will be of great interest to intercultural trainers, policymakers, development practitioners, educators, community organizers, civil society leaders, university lecturers and students -- all who are interested in developing intercultural competence as a means to understand and appreciate difference, develop relationships with those across difference, engage in intercultural dialogue and bridge societal divides"--
