This collection of unforgettable characters—including Anne Shirley, Jo March, Scarlett O'Hara, and Jane Eyre—and outstanding authors—like Jane Austen, Harper Lee, and Laura Ingalls Wilder—is an impassioned look at literature's most compelling heroines, both on the page and off. Setting the Table for Julia Child SUNY Press

A year-long study of the writing development of 27 first through third graders in an English/Spanish bilingual program was conducted during the 1980-81 school year. Samples of the children's writing were collected at four intervals, coded for computer tallying, and analyzed in terms of code-switching, spelling, punctuation and segmentation, structural features, stylistic devices, and content. Additionally, the context in which the writing developed was evaluated by classroom observations, teacher interviews, review of familial backgrounds, and a survey of the community language situation. Myths

about bilingual language proficiency, biliteracy, bilingual education, teaching writing, and learning to write are all countered by evidence presented in this study. In a discussion of implications, the concept of a whole language approach to writing instruction is supported, in which authentic and functional texts are offered to and produced by children. Examples of the children's writing with appropriate translations are given along with various tables. Informal follow-up information is presented in three epilogues dealing with changes in the researcher's commitment to the study's original writing theories, the writing of some students a year after the study; and a chronological outline of the demise of the bilingual program used in the study. Appendices list interview questions used for teachers and aides and categories for coding the writing data.

The distinctive group of forty colleges profiled here is a well-kept secret in a status industry. They outdo the Ivies and research universities in producing winners. And they work their magic on the B and C students as well as on the A students. Loren Pope, director of the College Placement Bureau, provides essential information on schools that he has chosen for their proven ability to develop potential, values, initiative, and risk-taking in a wide range of students. Inside you'll find

Loren Pope encourages you to be a hard-nosed consumer when visiting a college, advises how to evaluate a school in terms of your own needs and strengths, and shows how the college experience can enrich the rest of your life.

McLean Where Have You Been, Where

Are You Going? Narrative Identity

in Adolescence How can we help

youth move from childhood to adulthood in the most effective and positive way possible? This is a question that parents, educators, researchers, and policy makers engage with every day. In this book, we explore the potential power of the stories that youth construct as one route for such movement. Our emphasis is on how those stories serve to build a sense of identity for youth and how the kinds of stories youth tell are informed by their broader contexts - from parents and friends to nationalities and history. Identity development, and in particular narrative identity development, concerns the ways in which adolescents must integrate their past and present and articulate and

anticipate their futures (Erikson, 1968). Viewed in this way, development is not only unique to adolescence (and emergent adulthood), but also intimately linked to childhood and to adulthood. The title for this chapter, borrowed from the Joyce Carol Oates story, highlights the precarious position of adolescence in relation to the construction of identity. In this story, the protagonist, poised between childhood and adulthood, navigates a series of encounters with relatively little awareness of either her childhood past or her potential adult futures. Her choices are risky and her future, at the end, looks dark.

In the last several years, much has been written about growing economic challenges, increasing income inequality, and political polarization in the United States. Addressing these new realities in America's metropolitan regions, this book argues that a few lessons are emerging: first, inequity is bad for economic growth; second, bringing together the concerns of equity and growth requires concerted local action; and third, the fundamental building block for doing this is the creation of diverse and dynamic epistemic (or knowledge) communities, which help to

overcome political polarization in Global Information and Social and to address the challenges of Entrepreneurship, Director of economic restructuring and the Everett Program for Digital social divides. This is a book which is long overdue and one that treats Lincoln as an international figure, not merely an American one. It examines events leading to the US invasion of Mexico, Lincoln's opposition to it in the Congress, his support of Mexico as President during and after the US Civil War, and the impact of the Mexican-American War nationally and internationally.
