"Unlike any other MIS text, Business Driven Technology, 9e, discusses various business initiatives first and how technology supports those initiatives second. The premise for this unique approach is that business initiatives should drive technology choices. Every discussion in the text first addresses the business needs and then addresses the technology that supports those needs"--

DSST stands for DANTE Subject Standardized Tests. They are credit-by-examination tests intended for students to demonstrate proficiency in an area of study normally taught at a college. The MIS DSST exam covers topics that would typically be taught in an undergraduate computer course, with questions being delivered in computerized multiple-choice format. Topics covered include:>Evolutionary history Terminology Hardware and

components Hardware devices>History and evolution software and programming Terminology Software types>Terminology The enterprise and the strategic importance Components of networks and telecommunications Network security Topology and protocols>E-Commerce (Electronic Commerce) Different types of information systems Enterprise resource planning>Characteristics of a system Systems architecture and methodologies Systems Development Life Cycle (SDLC)>Data models and structures Database management systems (DBMS) Data query>Knowledge management (KM) Data mining and warehousing Data mining>Organization of MIS Relationship of MIS to the enterprise Value of the MIS function>Security (Data confidentiality) Hidden cost Ethics Privacy (Data confidentiality) Global issues We give you knowledge information relevant to the exam specifications. To be able to succeed in the real exam, you'll need to apply your earned knowledge to the question scenarios. Many of the

exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios. The exam is not too difficult. However, coverage is very comprehensive - a wide range of topics are presented in the official topic lists. The exam does not ask you to answer hundreds of questions. In other words, only a small fraction of the official topics will be presented. This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome. We are not affiliated with nor endorsed by the DANTES brand.

The Grace of Les Miserables

Abingdon Press

Victor Hugo's Les Misérables is a truly epic story. Whether you've tackled the 1,400-page 19th-century novel, witnessed the Broadway musical (and memorized its soundtrack), or seen the several screen adaptations of it, you already know the power of its story. In the six-week study The Grace of Les Misérables, author and pastor Matt Rawle dives into six ideals found in the

story—grace, justice, poverty, revolution, love, and hope—each represented by a character in Hugo’s story. As these imperfect and relatable characters interact, we can see how these ideals work together (perhaps even in spite of each other) out in the world. In keeping with his previous works, Matt Rawle brings us to the intersection of Church and Pop Culture by drawing parallels between the iconic story and musical and our Christian calling, inspiring us to both understand our faith and live it out in the world. A DVD, Leader Guide, youth resources, and Worship Resource Flash Drive are also available for a six-week study.

The acclaimed book behind the 2018 Sundance Grand Jury Prize-winning movie "LGBTQ cinema is out in

force at Sundance Film Festival," proclaimed USA Today. "The acerbic coming-of-age movie is adapted from Emily M. Danforth's novel, and stars Chloë Grace Moretz as a lesbian teen who is sent to a gay conversion therapy center after she gets caught having sex with her friend on prom night." The Miseducation of Cameron Post is a stunning and provocative literary debut that was named to numerous best of the year lists. When Cameron Post's parents die suddenly in a car crash, her shocking first thought is relief. Relief they'll never know that, hours earlier, she had been kissing a girl. But that relief doesn't last, and Cam is forced to move in with her conservative aunt Ruth and her well-

intentioned but hopelessly old-fashioned grandmother. She knows that from this point on, her life will forever be different. Survival in Miles City, Montana, means blending in and leaving well enough alone, and Cam becomes an expert at both. Then Coley Talor moves to town. Beautiful, pickup-driving Coley is a perfect cowgirl with the perfect boyfriend to match. She and Cam forge an unexpected and intense friendship, one that seems to leave room for something more to emerge. But just as that starts to seem like a real possibility, Aunt Ruth takes drastic action to "fix" her niece, bringing Cam face-to-face with the cost of denying her true self—even if she's not quite sure who that is. Don't miss this raw

and powerful own voices debut, the basis for the award-winning film starring Chloë Grace Moretz.

The definitive refutation to the argument of The Bell Curve.

When published in 1981, *The Mismeasure of Man* was immediately hailed as a masterwork, the ringing answer to those who would classify people, rank them according to their supposed genetic gifts and limits. And yet the idea of innate limits—of biology as destiny—dies hard, as witness the attention devoted to *The Bell Curve*, whose arguments are here so effectively anticipated and thoroughly undermined by Stephen Jay Gould. In this edition Dr. Gould has written a substantial new introduction telling how and why he wrote the book and tracing the subsequent history of the controversy on innateness right through *The Bell Curve*. Further, he has added five essays on questions of *The Bell Curve* in particular and on race, racism, and biological determinism in general. These additions strengthen the book's claim to be, as Leo J. Kamin of Princeton University has said, "a major contribution toward deflating pseudo-biological 'explanations' of our present social woes."
