Franklin, Jack, Marla, Thadius,
and Caitlin... this unlikely group
of assorted misfits are the
Cemetarians, a group that will
take on any job - no, really, we
mean any bloody job (money's a bit
tight right now)! Trudge through
disgusting sewers to battle
manatee-massacring mermaids and
soggy cultists, creep through
creepy, fog-littered cemeteries
straight out of an ancient Hammer
Film soundstage, confront undead
lecherous lodgers and other
assorted beasties, creepies, and
ghoulies. It all comes down to
whether an adolescent giant
Automaton, a truly mad, Mad
Scientist, a surly Necromancer, a
Banshee's granddaughter, and a
reluctant furry monster straight
from under your little sister's

bed can manage not to kill each
other - or, at least, quit fighting
over the tele-privilege-schedule
long enough to get the job done!
Not likely.

This book presents the papers from the
Internal Combustion Engines:

Performance, fuel economy and
emissions held in London, UK. This
popular international conference from
the Institution of Mechanical Engineers
provides a forum for IC engine experts
looking closely at developments for
personal transport applications, though
many of the drivers of change apply to
light and heavy duty, on and off
highway, transport and other sectors.
These are exciting times to be working
in the IC engine field. With the move
towards downsizing, advances in FIE
and alternative fuels, new engine
architectures and the introduction of
Euro 6 in 2014, there are plenty of
challenges. The aim remains to reduce
both CO2 emissions and the
dependence on oil-derivate fossil fuels
whilst meeting the future, more stringent
constraints on gaseous and particulate
material emissions as set by EU, North

American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. - Presents the latest requirements and challenges for personal transport applications - Gives an insight into the technical advances and research going on in the IC Engines field - Provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Lightweight Electric/Hybrid Vehicle Design covers the particular automotive design approach required for hybrid/electrical drive vehicles.

There is currently huge investment world-wide in electric vehicle propulsion, driven by concern for pollution control and depleting oil resources. The radically different design demands of these new vehicles requires a completely new approach that is covered comprehensively in this book. The book explores the rather dramatic departures in structural configuration necessary for purpose-designed electric vehicle including weight removal in the mechanical systems. It also provides a comprehensive review of the design process in the electric hybrid drive and energy storage systems. Ideal for automotive engineering students and professionals Lightweight Electric/Hybrid Vehicle Design provides a complete introduction to this important new sector of the industry. - Comprehensive coverage of all design aspects of electric/hybrid cars in a single volume - Packed with case studies and applications - In-depth treatment written in a text book style (rather than a theoretical specialist text style)

Japanese Motor Business

This new edition of a classic feminist book explains how one of the great historical revolutions - the ongoing movement toward equality between the sexes - has come about. Its origins are to be found, not in changing ideas, but in the economic developments that have made women's labour too valuable to be spent exclusively in domestic pursuits. The revolution is unfinished; new arrangements are needed to fight still-prevalent discrimination in the workplace, to achieve a more just sharing of housework and childcare between women and men, and, with the weakening of the institution of marriage, to re-erect a firm economic basis for the raising of children.
