The Viper stunned Americans by showing that Dodge, whose cars were all front-wheel drive (and mostly powered by four-cylinder engines), could make a raw, brutal, V10-powered car that could run with the best. Team Viper went a step further at Le Mans, proving that an American car could handle turns, too; so well that it won its class, repeatedly, at a fraction of the cost of the cars it beat. This book covers the transition from a concept to a rough and brutal rocket to a world-class supercar, and includes every generation. The story also tells of the rough times when the entire Viper business could have been sold to the highest bidder, and considers alternative paths the 2013-17 Viper might have taken. This is not just a gushing tribute to the Dodge Viper, the author provides an objective view of the full story, using business, historical, and enthusiast perspectives. The book looks at the business case for each generation, the development stories and their outcomes, and describes some of the issues owners may have to watch out for, particularly in the early models.

Ken Genie knows tragedy. His dad passed away and his brother ditched town. Ken also knows cars. He studies them, obsessively. But his mother is afraid to lose another son, and she won't let Ken get behind the wheel. Local millionaire Edmond Tremonte has a grudge against the Genie family. And he plans to take it out on their entire Alaska town. When Tremonte loses his business and then his mind, he builds a mechanical beast designed for maximum damage. And despite the wishes of Ken's mom, Ken and his Mitsubishi might be the only things that can stop Tremonte's reign of terror. Includes real tech specs and tuning details for the Mitsubishi Eclipse!

This resource explains how to rebuild and modify transmissions from both rear- and front-wheel-drive cars. It explains the principles behind the workings of all manual transmissions, and helps readers understand what they need to do and know to rebuild their own transmissions. Includes how to determine what parts to replace; how and why to replace certain seals, spacers, springs, forks, and other parts; and where to find (and how to measure) the specifications for each particular transmission.
