Focus On: 100 Most Popular Station Wagons Phoenix

This book is a sound and comprehensive introduction to advertising planning and branding. Intended for students of and beginners in advertising and marketing, it discusses key issues and market realities, many of which are ignored and neglected in developing markets. The structure of this book follows a stepwise process, which starts from the beginning of the advertising planning process to the end product, which is the creative brief. Each chapter discusses a conceptual principle, which is illustrated by relevant examples. Some key issues discussed in this book are: - planning for communication in a context; - Segmentation: studying and understanding the dimensions, demographics, and psychographics of the target group; - Differentiators and Motivators: discovering what can change the consumers' mind; " managing a brand over time, looking at the entire life-cycle of a brand. Each chapter ends with an 'Action Point', which helps the reader to apply the principles discussed through an exercise.

From Fluid Mechanics to Vehicle Engineering SAGE

A Journal Published in the Interests of the Mechanically Propelled Road Carriage

Aerodynamics of Road Vehicles details the aerodynamics of passenger cars, commercial vehicles, sports cars, and race cars; their external flow field; as well as their internal flow field. The book, after giving an introduction to automobile aerodynamics and some fundamentals of fluid mechanics, covers topics such as the performance and aerodynamics of different kinds of vehicles, as well as test techniques for their aerodynamics. The book also covers other concepts related to automobiles such as cooling systems and ventilations for vehicles. The text is recommended for mechanical engineers and phycisists in the automobile industry

who would like to understand more about aerodynamics of motor vehicles and its importance on the field of road safety and automobile production.
