Buying a car is a personal choice that has become a more complex decision because of advances in technology, and reliability issues that are haunting some car makers. Many consumers look to Zack Spencer, the host of Driving Television, for straightforward, no-nonsense, expert advice. In Motormouth, you will find out which vehicles are the safest, most reliable, and best value for your hard-earned dollar. In an easy-to-understand format, you will get: Fuel economy ratings Pros and cons for performance, handling, comfort, and ease-of-use Standard safety features J.D. Power Initial Quality and Dependability scores Base warranty information Engine specifications Pricing for base models Reviews of option packages and trim levels Zack's Top Picks for each category Zack provides insider buying tips to help you, whether you are buying privately, off the internet, or making the rounds to different dealers. He also advises you on your decision to lease, purchase or finance. At your fingertips are strategies and lessons learned from people's adventures in car buying, some with happy endings and others not-so-happy. From a fuel-sipping family friendly hauler to a rubber-burning luxury sports car, you can rely on Motormouth 2011 edition for the information you need to make a wise purchase decision. Go prepared and don't get stuck with a lemon. Take Motormouth along for the ride.

[Transportation Energy Data Book](#) John Wiley & Sons

This is an e-Book giving you some guidelines on driving, saving fuel and buying a car. Popular Science Springer

The Ford FE (Ford Edsel) engine is one of the most popular engines Ford ever produced, and it powered most Ford and Mercury cars and trucks from the late 1950s to the mid-1970s. For many of the later years, FE engines were used primarily in truck applications. However, the FE engine is experiencing a renaissance; it is now popular in high-performance street, strip, muscle cars, and even high-performance trucks. While high-performance build-up principles and techniques are discussed for all engines, author Barry Rabortnick focuses on the max-performance build-up for the most popular engines: the 390 and 428. With the high-performance revival for FE engines, a variety of builds are being performed from stock blocks with mild head and cam work to complete aftermarket engines with aluminum blocks, high-flow heads, and aggressive roller cams. [How to Build Max-Performance Ford FE Engines](#) shows you how to select the ideal pistons, connecting rods, and crankshafts to achieve horsepower requirements for all applications. The chapter on blocks discusses the strengths and weaknesses of each particular block considered. The book also examines head, valvetrain, and cam options that are best suited for individual performance goals. Also covered are the best-flowing heads, rocker-arm options, lifters, and pushrods. In addition, this volume covers port sizing, cam lift, and the best rocker-arm geometry. The FE engines are an excellent platform for stroking, and this book provides an insightful, easy-to-follow approach for selecting the right crank, connecting rods, pistons, and making the necessary block modifications. This is the book that Ford FE fans have been looking for.

Stolen vehicles and stolen lives are abound in this dark and dangerous underground that has taken over our highways and streets, all in the name of fun! A fact filled assault on illegal street racing, drifting, stunting, and even car shows; often inundated with larceny, deceit, injuries, and death. Exam years of hands on real stories of theft, fraud and the Fast and Fraudulent scene and what can be done to identify problem areas; recover stolen vehicles and parts; identify fraud; save lives; prevent injuries and protect property. This internationally recognized expert has researched every angle of this scene packing pages with facts, investigative techniques and solutions. Over a decade of hands on investigations and requests for training on this scene prompted this book. With testimonials including such praises as: Mike Bender's presentation concerning the direct link between Street Racing and Auto Crimes is without the doubt the most comprehensive available world wide. Mike's direct knowledge and enthusiasm is very evident in the first minutes of his presentation. As a long time auto crimes investigator and a drag racer I can attest that Mike's program is filled with current and accurate information. This class is a must for any street officer, auto theft investigator or insurance investigator. A must read for Law Enforcement, Auto Theft Investigators, Insurance Companies, Fraud Investigators, Parents and Educators To view chapter content and learn more about the fatal consequences of illegal street racing go to: <http://protectourstreets.org> and click on the book.

[Owner's Repair Guide for Mitsubishi Colt, Lancer, Lancer Estate 1.2 and 1.5 Litre Engines, 1984-88](#) e-artnow sro

Enlarged new edition of the definitive international history of Mazda's extraordinary successful Wankel-engined coupes & roadsters right up to the end of production and the introduction of the RX-8.

[Carroll Shelby](#) CarTech Inc

A brand new title in the best-selling SpeedPro! series. Covers 3.5, 3.9, 4.0 & 4.6 litre engines from 1967 to date. Maximum road or track performance & reliability for minimum money. The author is an engineer with much professional experience of building race engines. Suitable for the enthusiast as well as the more experienced mechanic. All the information is based on practical experience.

[The Fine Art of the Motorcycle Engine](#) Veloce Publishing Ltd

[How to Build Max-Performance Mitsubishi 4G63 Engines](#) covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, however, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts, including bolt-ons and transmission and drivetrain upgrades. Profiles of successful built-up engines show the reader examples of what works and helpful guidance for choosing the path of their own engine build.

Booktango

Tuning engines can be a mysterious art, all engines need a precise balance of fuel, air, and timing in order to reach their true performance potential. [Engine Management: Advanced Tuning](#) takes engine-tuning techniques to the next level, explaining how the EFI system determines engine operation and how the calibrator can change the controlling parameters to optimize actual engine performance. It is the most advanced book on the market, a must-have for tuners and calibrators and a valuable resource for anyone who wants to make horsepower with a fuel-injected, electronically controlled engine.

[Popular Science](#) Itchygooney Books

Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts

everywhere are more active today than ever in preserving, modifying and racing these excellent cars.

Throughout this time, the author in true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark Cylinder head mods, big-brake mods, LSD adjustment procedure, electrical system improvements, plus many flow-bench diagrams, dyno plots, and much more.

[How to Tune and Modify Engine Management Systems](#) e-artnow sro

Build a powerful and reliable engine the first time - without wasting money on incompatible components or modifications that don't work. Burgess covers the BMC/British Leyland B-series engine (except the early 3-bearing crankshaft unit) as fitted to the MGB and MGB GT. Provides advice on MGB/MGB GT suspension, brakes and dyno tuning.

[Fundamentals of Automotive and Engine Technology](#) Lulu.com

Don't these boys get it? How many times must they get into trouble before they catch on? Best friends William and Thomas are back at it again with even more action and adventure. The poor community of Itchygooney isn't safe when William has a plan. This time there's an attack drone, a ghostly rocking chair, a slam-dunking wizard, and a UFO. Will these boys ever be stopped? Let's hope not! Back 4 More is the fourth book in the ongoing I Told You So series of humorous stories shared in short standalone bursts. If they were any longer you couldn't handle it!

[How to Power Tune Rover V8 Engines for Road & Track](#) Motorbooks

Expert practical advice from an experienced race engine builder on how to build a high-performance version of Ford's naturally aspirated 4-cylinder 1600, 1800 & 2000cc Pinto engine which has been used in Ford's most popular cars (Escort, Capri, Cortina & Sierra -

Ford/Mercury Capri, Pinto, Bobcat in USA) over many years. Whether the reader wants a fast road car or to go racing, Des explains, without using technical jargon, just how to build a reliable high-power engine using as many stock parts as possible and without wasting money on parts and modifications that don't work. Also covers Cosworth versions of Pinto engines and fitting Cosworth heads to Pinto blocks. Does not cover 1300, E-Max 1600 or American-built 2300.
